Naslov: RegioSpeicher Mosbach - EPC - Engineering, procurement and construction (EPC) of a lithium-ion battery storage facility with 10 MW of active power consumption

Opis: Founded in 1999, Trianel GmbH ("Trianel") is a joint venture of independent municipal utilities based in Aachen. As a Europe-wide municipal utility cooperation, Trianel taps the potential of liberalized energy markets by bundling complementary interests in the municipal environment with the aim of strengthening municipal utilities in their competitiveness and thus their independence. Trianel's shareholders are more than 50 municipal utilities from Germany, Austria, Switzerland and the Netherlands, which together supply around 6 million people with electricity and gas. More than 100 municipal utilities are linked to Trianel via subsidiaries and associated companies as well as partnership agreements. The Trianel Group currently has around 15 subsidiaries and associated companies. The construction services described in this tender are a joint procurement of "Stadtwerke Mosbach GmbH" (municipal utilities) and Trianel Flexibilitätsprojekte GmbH & Co. KG ("TFP"), a subsidiary company of Trianel GmbH. Scope of the project is the engineering, procurement and construction (EPC) of a lithium-ion battery storage facility with 10 MW of active power consumption in Mosbach (Baden-Württemberg). For this purpose, RegioSpeicher Mosbach GmbH & Co. KG, a project company will be established.

5. Grupa

5.1. Grupa: LOT-0001

Naslov: RegioSpeicher Mosbach - EPC - Engineering, procurement and construction (EPC) of a lithium-ion battery storage facility with 10 MW of active power consumption
Opis: Preliminary Scope of Work: The project comprises the implementation of a turnkey 10 MW / 20 MWh AC-coupled Battery Energy Storage System (BESS) connected to the public grid via an existing 20 kV grid connection point at an adjacent MV/HV substation in 74821 Mosbach, Germany. At the grid connection point, the storage is supposed to deliver a power of 7.5 to a maximum of 10 MW and have a capacity of 2 to a maximum of 3 hours. The BESS should preferably be based on lithium-ion or sodium-ion battery technology and designed for commercial operation in the German electricity market. The possible lithium-ion technologies will be specified in more detail during the tender. The system is expected to support, among others, participation in Frequency Containment Reserve, Automatic Frequency Restoration Reserve, Day-Ahead and Intraday markets. The project site has already been secured and is currently used as agricultural land. The existing substation is located on the adjacent property, with an estimated cable route of less than 100 m. The site is located within Water Protection Zone III, which requires appropriate consideration of water protection, containment, drainage and environmental requirements. Planning permission for this project has not yet been granted. The project is intended to be tendered as a turnkey EPC project, including engineering, procurement, construction, installation, grid connection interface, testing, commissioning and handover of a fully operational BESS. The tender may also cover related maintenance services, which are subject to a Long-Term Service Agreement (LTSA). The contracting authorities reserve the right to set the term of this LTSA for up to 15 years. The companies have no legal right to conclude an LTSA with a specific term. The final technical requirements, interface definitions, contractual conditions and detailed scope of work will be specified during the subsequent RFP phase. Further information can be found in the procurement documents that will be issued after the conclusion of the participation competition.

Dodatne informacije: 1. The application documents (forms) can be downloaded from the link in this notice. The use of the application documents is binding. Should further information or clarifications on the part of the contracting authorities become necessary during the award procedure, this additional information will also be published there. Applicants must therefore regularly check whether further information has been published. A registration for the award platform facilitates access and information to the applicant information. 2. Questions regarding the requirements of this notice and the application documents should be submitted promptly, but no later than the date published on the award platform. The contracting authorities reserve the right not to answer questions received later. 3. The information contained in this notice is solely for the purpose of providing interested companies an impression and enabling them to decide whether to participate in the process. The contracting authorities reserve the right to make deviations and specifications in the course of negotiations. 4. Applications shall be submitted electronically to the contracting authorities via the award platform. Until the expiry of the application deadline, the applications are encrypted so that the contracting authorities have no access to them. However, the applicant is free to edit and re-upload his/her application until the expiration of the deadline. 5. The contracting authorities reserve the right to cancel the procedure for factual reasons, particularly in the event that the relevant planning permission is not granted. Claims for compensation by applicants and bidders are - as far as legally permissible - excluded. By downloading the application documents, the applicant agrees to this. 6. Further procurement documents, including the contract and the award criteria, shall not be issued until after completion of the call for competition. 7. After receipt of the applications and their evaluation, the selected applicants will be sent the award documents with an invitation to the negotiation meetings. The negotiation meetings will be held in Aachen or by video conference. 8. By submitting the application, the applicant undertakes to treat all documents sent to it, if any, as confidential and to maintain the secrecy of the competition in all other respects; this also applies with regard to the respective offer. The contracting authorities,

for their part, will use the applicants' documents only for the purposes of the procedure. The tender documents issued during the tender phase contain confidential information. The tender documents will therefore only be issued with invitation to tender to those tenderers who have submitted their application to participate together with a signed copy of the NDA enclosed in the application documents. 9. Applicant consortia must submit a legally binding declaration signed by all members with their application, which is included in the application documents. If, in the course of the procedure, an existing applicant/bidding consortium changes its composition or an individual applicant/bidder wishes to continue the procedure in an applicant /bidding consortium, this shall only be permitted with the express written consent of the contracting authorities. In any case, consent shall not be granted if the change significantly impairs competition or if the change has an impact on expertise and economic performance. This shall apply accordingly to subcontractors. 10. The contracting authorities reserve the right to reduce the number of selected bidders in the course of the negotiation procedure. Further details in this regard are contained in Invitation to Tender, which will be issued upon conclusion of the call for competition. 11. The applicants or bidders are requested to clearly mark on each relevant page those parts of their application or offer which legitimately contain trade or business secrets (Sec. 165 para. 2, 3 GWB). If this is not done, the Chamber for Procurement or the Appeals Body may assume the consent of the respective applicant or bidder to inspection by other parties to the proceedings in the event of a review of the award of contract.

5.1.7. Strateška nabava

Cilj strateške nabave: Nema strateške nabave

5.1.9. Kriteriji za odabir

Izvori kriterija odabira: Obavijest

Kriterij: Mjere za osiguranje kvalitete

Opis kriterija odabira: Only the references (technical and professional ability) are decisive for the assessment of suitability. The information and evidence listed under TL are used to assess the references. A maximum total of 1,000 points can be achieved here. The proofs PL and WL are not evaluated qualitatively. The evaluation of technical and professional ability is carried out in a relative comparison of the applicants with each other on the basis of the following scale /grade levels. The maximum number of points achievable is multiplied by the weighting factor (percentage) achieved in each case: - 100% = very good: Applicant meets the requirements with regard to the suitability criterion to the very highest degree, - 80% = good: Applicant meets the requirements of the suitability criterion to the highest degree, - 60% = fully satisfactory: applicant meets the requirements of the suitability criterion to a high degree, - 40% = satisfactory: applicant satisfactorily fulfills the requirements with regard to the suitability criterion, - 20% = sufficient: the applicant meets the requirements of the suitability criterion to a just sufficient degree. In the range between 0% and 100%, intermediate grade levels can be formed (10%, 30%, 50%, 70%, 90%) to take into account a tendency towards the higher grade level in each case. An evaluation of a suitability criterion (technical and professional ability) with 20% or less would correspond to a complete non-fulfillment of the respective suitability criterion, which would result in the exclusion of the participation application (knock-out criterion). These are suitability criteria, not award criteria. If several bidders achieve the same total score and the number of bidders exceeds the planned number of bidders to be invited to negotiate, the contracting authorities reserve the option to draw lots for the negotiation procedure among the remaining bidders with equal scores.

Na kriterijima će se temeljiti odabir natjecatelja koji će biti pozvani u drugu fazu postupka
Ponder (točke, točan): 1 000,00

Kriterij: Upis u trgovački registar

Opis kriterija odabira: The documents which the applicant must enclose with its application to participate are listed below. For this purpose, the applicant must use the forms (application documents) provided by the contracting authorities. Submitted supporting documents must still be valid; insofar as requirements are made regarding up-to dateness, the date refers to the date of publication of this notice. With their request to participate, applicants must submit the following documents: PL1. Self-declaration regarding exclusion criteria (Sec. 123, 124 GWB). A form is included in the application documents. PL2. Self-declaration on the company with information on the company name, legal form, registered office, object, management of the company, company structure (e.g. parent companies, group affiliation, branches - organization chart), with presentation of the company and capital relationships of the applicant and, if applicable, the responsible branch office and query on SME status. A form is included in the application documents. PL3. Self-declaration on the 5th EU package of sanctions ("RUS sanctions"). A form is included in the application documents. In the case of applicant consortia, the evidence must be provided by each member of the applicant consortium. A loan of qualifications in accordance with Section 47 SektVO for the purpose of demonstrating PL is not permitted. If an applicant is unable to provide any required evidence for a valid reason, it may demonstrate its ability to perform by submitting other appropriate evidence. The contracting authorities reserve the right to request further self-declarations and certificates for applicants selected at the end of the call for competition and any subcontractors upon separate request with the submission of the offer.

Kriterij: Prosječni godišnji promet

Opis kriterija odabira: WL1. Self-declaration concerning the economic and financial capabilities of the applicant, in particular statement of total turnover of the applicant of the last 3 financial years. The form in the application documents shall be used. WL2. Selfdeclaration of the annual turnover of the applicant for services comparable with the services put out in this tender (the decisive factor for comparability is turnover for engineering, procurement and construction (EPC) with regard to Battery Energy Storage System projects) in the last 3 financial years. In the case of applicant consortia, the evidence can be provided for the applicant consortium in total. In the case of a loan of qualifications pursuant to Section 47 SektVO, particularly where subcontractors are involved, the relevant supporting documents must be submitted for the relevant companies. If an applicant is unable to provide any required evidence for a valid reason, it may demonstrate its ability to perform by submitting other appropriate evidence. The contracting authorities reserve the right to request further self-declarations and certificates for applicants selected at the end of the call for competition and any subcontractors upon separate request with the submission of the offer. The contracting authorities reserve the right to obtain financial information on the applicant.

Kriterij: Reference na određene radove

Opis kriterija odabira: TL. Experience in the execution of comparable construction services, evidenced by reference projects (realized similar projects in connection with engineering, procurement and construction (EPC) with regard to Battery Energy Storage Systems in the last maximum of 5 years (self-declarations)). Similar means a reference project with a minimum capacity of 5 MWh. The reference projects must have been carried out or completed within the last 5 years. In the case of applicant consortia, corresponding information can be submitted for the applicant consortium as a whole. In the case of a loan of qualifications pursuant to Section 47 SektVO, particularly where subcontractors are involved, the relevant supporting documents must be submitted for the relevant companies. The references are to be

submitted in accordance with the form from the application documents with the information specified therein, in particular including project start and actual operating period. If possible, please submit no more than 5 references and sort them according to their relevance and comparability with the subject of the tender. In individual cases, the contracting authorities may request the submission of reference certificates from the reference clients. Minimum level of standard: The bidder must have realized at least two similar reference projects of comparable size in the European Union or UK (successful commissioning of the relevant system).
Na kriterijima će se temeljiti odabir natjecatelja koji će biti pozvani u drugu fazu postupka
Ponder (točke, točan): 1 000,00

Kriterij: Certifikati instituta za kontrolu kvalitete

Opis kriterija odabira: Valid certification for a quality management system (e.g., in accordance with DIN EN ISO 9001) or an equivalent system. The scope of the certificate must cover the services specified in this request for proposals (e.g., EPC-contractor, system integration, manufacturing). The certificate must be issued by an accredited certification body and must still be valid as of the application deadline.

5.1.16. Dodatne informacije, posredovanje i pravna zaštita (preispitivanje)

Organizacija za preispitivanje (pravnu zaštitu): Vergabekammer Rheinland - Bezirksregierung Köln

Informacije o rokovima za preispitivanje: Application of public procurement law and jurisdiction of the Public Procurement Tribunal: The contracting authorities assume that the relevant EU thresholds for the applicability of sector-specific public procurement law (cf Directive on procurement by entities operating in the water, energy, transport and postal services, No. 2014 /25/EU) have not been reached in this tender. For this reason, the following explanations and the reference to the public procurement tribunal are provided purely as a precautionary measure. The time-limit for appeal is regulated under Sec. 160 para. 3 GWB. The application is inadmissible if: 1) The applicant became aware of the alleged violation of provisions governing the awarding of public contracts before submitting the appeal and did not object to the contracting entity within 10 calendar days; the deadline stipulated in Sec. 134 para. 2 remains unaffected; 2) Violations of provisions governing the awarding of public contracts which become apparent from the tender notice are not notified to the contracting entity by the end of the period specified in the notice for the submission of a tender or application; 3) violations of provisions governing the awarding of public contracts which only become apparent from the award documents are not notified to the contracting entity by the end of the period specified in the notice for the submission of a tender or application; 4) More than 15 calendar days have elapsed from the receipt of notification from the contracting entity that it is unwilling to redress the complaint. The above sentence does not apply to an application for a declaration of invalidity of the contract pursuant to Sec. 135 para. 1 no. 2 GWB. Sec. 134 para. 1 sentence 2 GWB remains unaffected.
