Opis: The objective of GIZ's global project Sustainable Economic Transformation and Sustainable Finance is to advance the transformation towards a more sustainable economy and financial sector, grounded in international standards and global agendas. To this end, the project implements activities in three main areas of intervention: - Pillar 1: Fostering global knowledge exchange and peer-learning regarding the sustainable transformation of the economy and the financial sector. - Pillar 2: Supporting development of policy and regulatory frameworks in partner countries governing the transformation toward a sustainable economy and financial sector in partner countries. - Pillar 3: Providing advisory services and technical assistance to embed sustainability in governance and financial decision-making of financial institutions. In pillar 2, the project supports partner countries in aligning their financial regulatory and policy frameworks with international standards and best practices on sustainable finance. The project's activities include, for example, supporting the development of national taxonomies in Rwanda, Peru, Senegal, Ghana, The Philippines, and Mexico. The support provided by GIZ is comprehensive, including strategic advice, capacity building, design of multi-stakeholder processes (e.g., coordination of technical expert groups, support for public consultation), drafting advice (e.g., on the selection of sectors and screening criteria), and supporting the taxonomy's dissemination and implementation. This process is complemented by peer-learning opportunities and featuring lessons learned from implementation in partner countries in relevant international and regional forums. The objective of this tender is to establish a flexible pool of specialized technical expertise that can support sustainable finance taxonomy initiatives in partner countries designated by GIZ during the contract period. The contractor will provide advisory services covering the development, enhancement and implementation of sustainable finance taxonomies, as well as related analytical work, capacity building and knowledge products.
