Informazioni supplementari: Regarding successive reductions: No shortlisting or reduction in the number of tenders will take place during the negotiation phase, notwithstanding that the option "Yes" has been selected under the section "Second Phase" – "Successive Reductions". ----- Each Contracting Entity reserves the right not to enter a Contract due to, e.g., political decisions within the municipality. Thus, after submitting the final tenderer each of the Contracting Entities will make a political decision, whether they can approve the procurement. Afterwards, the evaluation of the tender will be completed, based on specific combinations of ferries to be delivered to the Contracting Entities. Thus, the evaluation for the sub-criterion 'Price' and 'Time of delivery' will be evaluated based on the submitted prices and descriptions respectively, for the Contracting Entities choosing to place an order for a new ferry

----- Grounds for exclusion pursuant to Section 134a of the Danish Public Procurement Act Is the economic operator established in a country included on the EU list of non-cooperative jurisdictions for tax purposes and which has not acceded to the WTO Government Procurement Agreement or other trade agreements obliging Denmark to open its public procurement market to tenderers established in the country in question? The Contracting Entities shall furthermore exclude economic operators covered by the EU sanctions pursuant to Article 5k of Council Regulation (EU) No 833/2014, as amended, concerning restrictive measures in view of Russia's actions destabilising the situation in Ukraine. The Contracting Entities have chosen not to divide the procurement into separate lots. Based on economic considerations, the Contracting Entities have assessed that more advantageous prices can be achieved by awarding a single contract. In order to ensure the quality and coherence of the procurement as a whole, it is considered appropriate to award a single contract. Furthermore, from a market perspective, dividing the contract into lots is not considered likely to provide additional economic operators, including SMEs, with an increased opportunity to submit tenders. Applicants/tenderers are encouraged to seek clarification of any ambiguities or uncertainties by submitting questions concerning the procurement. All questions must be submitted via ETHICS by clicking "Send Question" under the "Communication" tab. The dialogue box must then be completed by stating the relevant reference and the question. By clicking "Send", the question will be submitted to the Contracting Entities. The Contracting Entities will answer questions by uploading a question-and-answer document, cf. Contract Appendix 15 – Questions & Answers. In accordance with the timetable, questions received before the deadline for questions will be answered by the Contracting Entities. Questions received after the expiry of the deadline for questions will only be answered if, having regard to the nature of the question, it would not be disproportionately burdensome for the Contracting Entities to answer the question before the deadline for answers. Questions received later than six (6) full days before the respective deadlines for submission of applications and tenders will, as a general rule, not be answered. Technical questions concerning the use of the ETHICS procurement system must be addressed to the support service by telephone on +45 70 22 70 07 or by clicking the "Customer Service" icon. At the earliest following notification of the pre-qualification and at the request of the Contracting Entities, the Tenderer and, where applicable, other entities or participants in a consortium shall provide documentation substantiating the information provided in the ESPD in connection with the pre-qualification, pursuant to Sections 144 and 152 of the Danish Public Procurement Act. The Contracting Entities are entitled, but not obliged, to request the Tenderer and, where applicable, other entities or participants in a consortium to supplement or clarify the documentation received, cf. Section 151(4) of the Danish Public Procurement Act. Documentation confirming that the economic operator is not subject to any grounds for exclusion If the Tenderer and, where applicable, other entities or participants in a consortium

are established in Denmark, documentation shall be provided in the form of a service certificate (serviceattest) issued by the Danish Business Authority. The service certificate shall contain information from: The Bankruptcy Court under the Danish Court Administration The Danish Tax Agency ATP The Danish Police (Criminal Register) Please note that a "consent declaration" must be completed and signed and uploaded when ordering the service certificate. The service certificate must be ordered via Virk.dk. The service certificate may not be more than six (6) months old, calculated from the date specified by the Contracting Entities as the deadline when requesting the documentation. For information, the processing time at the Danish Business Authority is approximately two (2) weeks from receipt of the order. If the Tenderer and, where applicable, other entities or participants in a consortium are not established in Denmark, the Tenderer shall, as a general rule, provide the types of documentation specified in e-Certis. e-Certis is an online information system used to identify the relevant documentation to be submitted by economic operators in connection with public procurement procedures in the EU Member States. If the countries concerned do not issue the relevant certificates or documents, or if the certificates or documents issued do not cover all relevant cases, they may be replaced by a declaration made on oath. If declarations made on oath are not provided for under the law of the country concerned, they may instead be replaced by a solemn declaration made by the economic operator. Verification of information provided in ESPD Part IV – Selection criteria Verification of the information provided in ESPD Part IV – Selection criteria shall be carried out as follows: Information concerning financial key figures may be verified on the basis of annual accounts or by submitting a declaration concerning the Tenderer's overall liquidity ratio and solvency ratio for the three (3) most recently completed financial years, unless the Contracting Entities can obtain the relevant information directly through access to a national database, or the Contracting Entities already possess the necessary documentation from previously conducted procurement procedures. No additional documentation concerning references is required.
