5.1.9. Atrankos kriterijai

Pasirinkimo kriterijų šaltiniai: Pranešimas
Kriterijus: Kiti ekonominiai ar finansiniai reikalavimai
Atrankos kriterijaus aprašymas: The tenderer shall be a legally established company.
Documentation requirements: • Norwegian companies: Company Registration Certificate. NB: The contracting authority will obtain company registration certificates from the brreg.no
Foreign companies: Proof that the company is registered in a trade or business register as prescribed by the law of the country where the tenderer is established.

Kriterijus: Kiti ekonominiai ar finansiniai reikalavimai
Atrankos kriterijaus aprašymas: Tenderers must have sufficient economic and financial capacity to be able to fulfil the contract. Documentation requirements: The company's annual accounts or extracts thereof if the publication of the annual accounts is required in the country where the tenderer is established. NB: Norwegian companies obtain the contracting authority's annual financial statements from brreg.no. Foreign companies can refer to an equivalent place where the Contracting Authority can obtain the Annual Financial Statements without costs. Or •The accounts' balance for the last three available fiscal years. This requirement only applies to companies where the publication of annual accounts is not required in the state where the company is established. • A statement of the company's total turnover for the maximum of the three last available fiscal years. The declaration can also apply to the turnover within the area that the contract applies if this information is relevant and available. This requirement only applies to companies where the publication of annual accounts is not required in the state where the company is established. And • Credit evaluation/rating, not older than 3 months, based on the last known accounting figures. NB: The contracting authority will obtain a credit rating from CreditSafe.

Kriterijus: Kiti ekonominiai ar finansiniai reikalavimai

Atrankos kriterijaus aprašymas: • Experience is required from deliveries of an equivalent nature and degree of difficulty. By an equivalent nature, we mean deliveries of sodium hypochlorite to water treatment. Documentation requirements: • An overview of the most important goods deliveries that the tenderer has carried out in the last three years, together with information on the contracts' value, date of delivery or execution and the name of the recipient. The contracting authority will also emphasise relevant deliveries that the tenderer has carried out more than three years ago.

Kriterijus: Kiti ekonominiai ar finansiniai reikalavimai

Atrankos kriterijaus aprašymas: Tenderers shall be suitable to fulfil the contractual requirements for due diligence assessments for responsible businesses within 6 months of the contract being signed. This means that the Tenderer has implemented measures and systems that are used in the Tenderer's work to safeguard basic human rights and decent working conditions, as well as prevent environmental degradation and corruption. Documentation requirements: • A description of the tenderer's systems for working with due diligence assessments in accordance with the UN's guiding principles for business and human rights (UNGP) and OECD's guidelines for multinational companies. The documentation shall include: • Formal policy/guidelines that cover an obligation to comply with the requirements of responsible businesses. • Formal policy/guidelines for accountability for sub-suppliers/the supplier chain, (Supplier Code of Conduct). This shall only be provided if sub-suppliers are used. • Descriptions of the tenderer's processes and routines for how the company works with due diligence assessments. • Description of how the tenderer will obtain and maintain an overview of the country of origin and production locations for the products that the tenderer offers. This shall only be delivered if the procurement includes goods.

Aprašymas: Environment: • Transport by vehicle over 3.5 tonnes for the last transport leg under the contract. Use of emission free or biogas based vehicles for 'last mile' transport of the contract services. The following gives a rating in the evaluation: •Emission free vehicles (battery electric or hydrogen): 10 points. •Biogas based vehicles (minimum Euro class 6/VI): 5 points.

Kategorija skyrimo kriterijaus svoris: Lyginamasis svoris (procentinė dalis, tikslus skaičius)

Skyrimo kriterijus: skaičius: 10

Kriterijus:

Rūšis: Kokybė

Aprašymas: The procurement is for sodium hypochlorite, which is necessary to ensure hygienic satisfactory water quality for Oslo residents. This makes the procurement critical for VAV. According to the Public Procurement Act (LOA.) § 1, public procurements shall promote effective use of resources in a socially beneficial perspective, which means that the contracting authority must prioritise its social mission. The contracting authority shall set climate and environmental requirements in accordance with the procurement regulations. The requirements must, however, be proportional and designed so that they do not unnecessarily limit the competition or the risk of missing tenders. This is particularly important as the service is critical for the water supply and a lack of deliveries will increase the vulnerability for VAV.

Main rule and exceptions: The Utilities Regulations (FFO.) § 7-9 second paragraph determine that climate and environmental considerations should be weighted with at least 30 percent under the award criteria. For this procurement, however, it is considered that it is "clear" that it provides better climate and environmental effect to set concrete requirements in the requirement specifications, cf. § 7-9 fourth paragraph. Justification for exceptions from the main rule on weighting climate and environmental considerations: KOFA has stated that the contracting authority must substantiate why the exception is applicable in the concrete procurement, in accordance with the requirement for verifiability, cf. the KOFA case 2025/0819 section 30. The justification shall show that the exception gives an objectively better climate and environmental effect, and that the contracting authority has a sufficient knowledge basis. It is sufficient that the effect is marginally better.

About sodium hypochlorite: The Drinking Water Regulation § 14 second section requires that manufacturers of water treatment chemicals, such as sodium hypochlorite 15%, shall be approved by the Norwegian Food Safety Authority. According to VAV's knowledge, there is only one manufacturer with certification of production. The composition of the chemicals is identical, independent of the wholesaler. It is, therefore, not appropriate to either evaluate or determine the minimum requirements for climate and environment effects connected to the chemical's characteristics/assembly.

About transporting the service ("last mile"). VAV has assessed the minimum requirements for reducing the climate and environmental footprint of transport. However, it is not possible to require that all "cargo mile" transport occurs with zero emission vehicles (100% battery electric or hydrogen powered) or biogas vehicles that at least meet Euro class 6/VI. Transport of sodium hypochlorite is covered by the regulations on land transport of hazardous goods and ADR regulations, cf. §§ 2 and 3. The substance is classified as hazardous goods in class 8 (corrosive substances), cf. § 3. The regulation sets requirements for vehicles that transport hazardous goods, but does not include any provision that restricts the use of alternative propulsion systems on tank vehicles. Electric vehicles are covered by the definition "vehicles" in § 3 and can be used if they fulfil the ADR requirements for safety and certification. Transport with 100% battery electrical vehicles is therefore allowed, provided that the vehicle is ADR certified and fulfils the requirements in the regulations (§§ 4 and 22) as well as ADR chapter 9. The market survey shows that available technology in the market does not fully meet the municipality's requirements for emission free or biogas based transport. In order to ensure a minimum level for environmental requirements, the transport shall, therefore, as a minimum, use certified sustainable bio-fuel. Due to the criteria of the procurement, it is too risky to set a phase-in time for more environmentally friendly fuel technologies. VAV is dependent on receiving tenders, and must therefore have requirements that are both relevant and relative. This shall ensure that VAV can deliver social critical water supply in accordance with applicable law and regulation requirements for drinking water. A rating will be given to tenderers who can document transport systems that deliver on biogas vehicles or emission-free vehicles, under the award criteria 'Environment', will be weighted by 10 percent. This will ensure a reward if there are suppliers who already fulfil the requirements when evaluating the different tender offers. See the Qualification and tender documentation point 7.2 as well as

annex 3 - List of vehicles. Other requirements for taking climate and environmental considerations into account: • Environmental management: Tenderers shall be third party certified in accordance with ISO 14001 or an equivalent environmental management system. This is a minimum requirement and therefore does not give excess value as the award criterium, as the certifications are equal in accordance with industry standards. • Minimum requirements in legislation and regulations: Tenderers shall handle, store and store sodium hypochlorite in accordance with the current regulations, including the drinking water regulations and the Pollution Act with the accompanying regulations. Conclusion: Together, VAV has assessed that the cumulative effect of the minimum requirements gives a better climate and environmental effect than following the main rule in the FFO. § 7-9 second sections.
