The framework covers development needs arising across VR Group companies, including but not limited to passenger services, logistics operations, infrastructure-related systems, commercial platforms, customer-facing digital services, and internal operational systems. The procurement is divided into two (2) lots: Lot 1: Web Development (e.g. web based technologies such as modern frontend frameworks and standards) Lot 2: Backend Development (e.g. backend systems, databases, cloud native development, and software development within commonly used backend technology ecosystems) Experts are assigned to VR's agile development teams, who operate according to VR's technology choices and established models where VR acts as the Product Owner and oversees overall project and development management. Work is carried out in a hybrid model, both on-site at VR's premises in Helsinki and remotely in accordance with VR's working guidelines. Tenderers are requested to note that the value stated above does not constitute the estimated value of the procurement, but the statutory maximum value as referred to in the Act. The maximum value also includes possible option periods of the procurement. VR Group does not commit to any minimum purchase volumes. Actual resource needs may increase or decrease during the contract period based on business requirements, technological development, and the lifecycle of projects and systems. The initial contract period is two (2) years, after which the Customer may extend the Agreement with four (4) optional periods of one (1) year each. This procurement will be carried out using an open procedure.
