2.1. Procedūra

Nosaukums: Transport services, framework agreement

Apraksts: The competition is for three sub-contracts for framework agreements for transport services. The transports involve transporting waste from recycling stations (sub-contract 1), delivery of glass and metal packaging (sub-contract 2) and transporting bulky/large waste (sub-contract 3). Participants in the procurement: Innherred Renovasjon is an intermunicipal sanitation company with its main office in Levanger. We are responsible for the collection and treatment of household waste and sludge in our 9 owner municipalities in Trøndelag: Inderøy, Verdal, Levanger, Frosta, Stjørdal, Meråker, Malvik, Selbu and Tydal. The estimated value per annum and the maximum value for the entire contract period per sub-contract, including any options and the expected price rise are stated in point 1.1.4. The need is uncertain. The volume can vary both up and down and the contract period will depend on, among other things, the contracting authority's needs, activities, budgetary situations and other framework factors. See the procurement documents for further information. The contract is subject to cancellation of the competition, i.e. in connection with budgetary coverage and the board's approval. The contracting authority has assessed the procurement against the Public Procurement Act § 5h and concluded that there is no requirement for apprentices in this procurement as the contract's main element does not include work where it is relevant to use labour with certificates of apprenticeship or craft, cf. the Procurement Act § 5h 2nd section letter c, subsidiary because the need requires specialised competence or for other reasons is not suitable for apprentices, Cf. the Public Procurement Act § 5h 4 paragraph. The following applies for sub-contract 1: The contracting authority has decided to set a minimum requirement from and including other contract years that vehicles used in the contract shall use biogas, hydrogen or electricity as an energy carrier. The requirement is meant to meet the Public Procurement Act §5b, which allows public contracting authorities to use climate and environmental requirements in the requirement specifications, if it is clear that this provides a better climate and environmental effect. The transport's direct emissions are obviously the most important part of the contract's total environmental impact. For example, a diesel vehicle with emissions of approx. 200 g CO₂/km and an annual driving length of 40,000 km will generate approx. 8 tonnes of CO₂ per annum. Hydrogen and battery electrical vehicles have zero direct emissions in the operational phase, while biogas vehicles in the lifetime perspective

provide very low, and in some cases net negative, CO₂-equivalent emissions. The requirement gives a significant and substantiated reduction in total emissions over the contract's lifetime. The contracting authority has considered using climate and the environment only as the award criteria. Such a model would, however, only give a relative ranking between the tenders, without ensuring that the delivery is actually low- or zero-emission based. If prices or other criteria are weighted higher, fossil-based solutions can still win the competition. Furthermore, evaluating environmental performance involves methodology challenges connected to documentation, calculation assumptions (e.g. well-to-wheel vs. tank-to-wheel), inspections and verifiability, which can increase the risk of doubt. The minimum requirement reduces this risk by determining a clear and objective level for acceptable environmental performance. The requirement is justifiable, proportional and connected to the delivery. The market can deliver sufficient competition within the stipulated frameworks. The assessments listed above document the environmental, technical and legal considerations that form the basis for choosing requirements, and fulfil the contracting authority's justification obligation in accordance with the Public Procurement Act §5b.

5.1. Daļa: LOT-0003

Nosaukums: Tender sub-contract 3 Roughly/large waste

Apraksts: The competition is for three sub-contracts for framework agreements for transport services. The transports involve transporting waste from recycling stations (sub-contract 1), delivery of glass and metal packaging (sub-contract 2) and transporting bulky/large waste (sub-contract 3). Participants in the procurement: Innherred Renovasjon is an intermunicipal sanitation company with its main office in Levanger. We are responsible for the collection and treatment of household waste and sludge in our 9 owner municipalities in Trøndelag: Inderøy, Verdal, Levanger, Frosta, Stjørdal, Meråker, Malvik, Selbu and Tydal. The estimated value per annum and the maximum value for the entire contract period per sub-contract, including any options and the expected price rise are stated in point 1.1.4. The need is uncertain. The volume can vary both up and down and the contract period will depend on, among other things, the contracting authority's needs, activities, budgetary situations and other framework factors. See the procurement documents for further information. The contract is subject to cancellation of the competition, i.e. in connection with budgetary coverage and the board's approval. The contracting authority has assessed the procurement against the Public Procurement Act § 5h and concluded that there is no requirement for apprentices in this procurement as the contract's main element does not include work where it is relevant to use labour with certificates of apprenticeship or craft, cf. the Procurement Act § 5h 2nd section letter c, subsidiary because the need requires specialised competence or for other reasons is not suitable for apprentices, Cf. the Public Procurement Act § 5h 4 paragraph. The following applies for sub-contract 1: The contracting authority has decided to set a minimum requirement from and including other contract years that vehicles used in the contract shall use biogas, hydrogen or electricity as an energy carrier. The requirement is meant to meet the Public Procurement Act §5b, which allows public contracting authorities to use climate and environmental requirements in the requirement specifications, if it is clear that this provides a better climate and environmental effect. The transport's direct emissions are obviously the most important part of the contract's total environmental impact. For example, a diesel vehicle with emissions of approx. 200 g CO₂/km and an annual driving length of 40,000 km will generate approx. 8 tonnes of CO₂ per annum. Hydrogen and battery electrical vehicles have zero direct emissions in the operational phase, while biogas vehicles in the lifetime perspective provide very low, and in some cases net negative, CO₂-equivalent emissions. The

requirement gives a significant and substantiated reduction in total emissions over the contract's lifetime. The contracting authority has considered using climate and the environment only as the award criteria. Such a model would, however, only give a relative ranking between the tenders, without ensuring that the delivery is actually low- or zero-emission based. If prices or other criteria are weighted higher, fossil-based solutions can still win the competition. Furthermore, evaluating environmental performance involves methodology challenges connected to documentation, calculation assumptions (e.g. well-to-wheel vs. tank-to-wheel), inspections and verifiability, which can increase the risk of doubt. The minimum requirement reduces this risk by determining a clear and objective level for acceptable environmental performance. The requirement is justifiable, proportional and connected to the delivery. The market can deliver sufficient competition within the stipulated frameworks. The assessments listed above document the environmental, technical and legal considerations that form the basis for choosing requirements, and fulfil the contracting authority's justification obligation in accordance with the Public Procurement Act §5b.

Atlases kritēriju avoti: Paziņojums

Kritērijs: Citi ekonomiski vai finansiāli prasījumi

Atlases kritērija apraksts: Tenderers shall have their tax and VAT payments in order.

Documentation requirement: Certificate for tax and VAT that documents compliance with tax and duty conditions. Norwegian tenderers: The certificate can be ordered from the altinn.no (RF-1507). Foreign tenderers: Certificate issued by the competent authority of the member

country, confirming that the tenderer has met the obligations in relation to the payment of VAT, taxes and social security contributions in the country where the tenderer/contractor belongs.

Note: The certificate shall not be older than 4 months from the tender deadline. The limit of

four months is set to ensure that the certificate is valid at the time of award, cf. the Procurement Act § 5l, which states that the certificate shall not be older than 6 months calculated from the time of award. According to the regulations §17-1(4), the Contracting Authority does not have the opportunity to request the certificate if it has already been received. If you have submitted a tax certificate to the contracting authority and it is still valid at the time of the tender submission for this competition, you will not be required to present a certificate now. If so, state when you have previously submitted the certificate and to whom. You can, however, enclose the certificate voluntarily if you want.

Kritērijs: Citi ekonomiski vai finansiāli prasījumi

Atlases kritērija apraksts: Requirements regarding the tenderer's economic and financial position: The economic capacity to fulfil this contract is required. Documentation requirement: The contracting authority will assess finances through the company and accounting information system Proff Forvalt (www.forvalt.no). The contracting authority reserves the right to obtain supplementary information about the tenderer's finances. Any need for support from other companies to fulfil this qualification requirement. If the tenderer is dependent on other companies to fulfil this qualification requirement, please provide an account below. The contracting authority will, in such cases, also assess the finances of the support business in the same way. If so, the contracting authority reserves the right to obtain supplementary information, commitment statement, bank guarantees etc.
