The utility entities which subscribe to the scheme are given at the following URL: <http://www.achilles.com/uvdbqsn>.

The UVDB may also be used in the compilation of tender lists below the EU thresholds. The subscribing utility entities may alternatively make separate calls for competition in OJEU for certain individual requirements.

The UVDB is based on a coding system for works, supplies and services against which suppliers are registered on the system. The full list of UVDB product codes is available at the following URL: <http://www.achilles.com/uvdbqsn>.

Vendors not already registered on the UVDB should apply to Achilles using the contact details at section I.1 in order to ensure that their details are available to subscribing utility entities.
