2.1. Proċedura

Titlu: Intelligent Transport Systems Equipment Frameworks Generation 2

Deskrizzjoni: Transport Infrastructure Ireland (TII) has a requirement to establish nine framework lots under the TII492 Intelligent Transport Systems Equipment Frameworks Generation 2 programme. Lots 1, 2 and 3A to 3F will support TII's ITS equipment requirements, while Lot 4 will establish a framework to support local authorities in delivering Periodic School Limit signage in accordance with a Government directive. The proposed framework term is four years. The estimated maximum value is €27 million for Lots 1, 2 and 3A to 3F, and €48 million for Lot 4, giving a total estimated maximum value of €75 million across all lots. Lots 1 – 3A to 3F (TII's requirement for ITS equipment) Transport Infrastructure Ireland (TII) operates and maintains a network of roadside Intelligent Transport Systems (ITS) equipment linked to the Motorway Operations Control Centre (MOCC) in Dublin Tunnel. This infrastructure supports the safe and efficient operation of the national road network. The ITS Equipment Framework will provide the contractual mechanism through which TII may procure ITS equipment, installation services and associated civil works required to maintain, renew and expand the network. Lot 4 (Department of Transport and local authorities requirement for ITS Equipment) A Government directive requires local authorities to install Periodic School Limit (PSL) signs at schools nationwide. Following engagement with the Department of Transport, Lot 4 has been included to establish a framework agreement through which local authorities may procure these works. TII's role will be limited to establishing the framework agreement and overseeing the eTenders system and monitoring framework ceiling limits. Local authorities will conduct mini-competitions and fund the resulting call-off contracts. TII does not currently expect to use Lot 4 directly, but will retain the option to do so if required.

5.1. Lott: LOT-0008

Titlu: Lot 3F single-supplier framework agreement for Automatic Number Plate Recognition (ANPR) and Closed-Circuit Television (CCTV) cameras

Deskrizzjoni: Transport Infrastructure Ireland (TII) has a requirement to establish nine framework lots under the TII492 Intelligent Transport Systems Equipment Frameworks Generation 2 programme. Lots 1, 2 and 3A to 3F will support TII's ITS equipment requirements, while Lot 4 will establish a framework to support local authorities in delivering Periodic School Limit signage in accordance with a Government directive. The proposed framework term is four years. The estimated maximum value is €27 million for Lots 1, 2 and 3A to 3F, and €48 million for Lot 4, giving a total estimated maximum value of €75 million across all lots. Lots 1 – 3A to 3F (TII's requirement for ITS equipment) Transport Infrastructure Ireland (TII) operates and maintains a network of roadside Intelligent Transport Systems (ITS) equipment linked to the Motorway Operations Control Centre (MOCC) in Dublin Tunnel. This infrastructure supports the safe and efficient operation of the national road network. The ITS Equipment Framework will provide the contractual mechanism through which TII may procure ITS equipment, installation services and associated civil works required to maintain, renew and expand the network. Lot 4 (Department of Transport and local authorities requirement for ITS Equipment) A Government directive requires local authorities to install Periodic School Limit (PSL) signs at schools nationwide. Following engagement with the Department of Transport, Lot 4 has been included to establish a framework agreement through which local

authorities may procure these works. TII's role will be limited to establishing the framework agreement and overseeing the eTenders system and monitoring framework ceiling limits. Local authorities will conduct mini-competitions and fund the resulting call-off contracts. TII does not currently expect to use Lot 4 directly, but will retain the option to do so if required.
