L-izvezja – Strumenti tal-metraġġ – Digital microscopes

OJ S 165/2026 27/08/2026

Avviż tal-kuntratt jew tal-konċessjoni – reġim standard

Provvisti

1. Xerrej

1.1. Xerrej

Isem uffiċjali: Dalarna Science Park

Email: dummy.dalarnasciencepark@ecenea.se

Tip legali tax-xerrej: Organizzazzjoni li tagħti kuntratt issussidjat minn awtorità tal-gvern ċentrali

Attività tal-awtorità kontraenti: Edukazzjoni

2. Proċedura

2.1. Proċedura

Titlu: Digital microscopes

Deskrizzjoni: The equipment covered by this procurement forms part of the establishment of the Materials Connection Arena (MCA), a new regional knowledge and innovation environment for advanced materials characterization, as well as industry-oriented research and collaboration in North Central Sweden. The initiative aims to strengthen the region's capabilities in research, innovation, skills development, and knowledge transfer by creating a shared platform through which academic institutions, research organizations, and industry stakeholders will gain access to advanced analytical equipment and specialist expertise. This procurement comprises two key instruments that will form an important part of the analytical infrastructure of the Materials Connection Arena: 1. A digital microscope system with integrated or fully compatible LIBS-based elemental analysis (Laser-Induced Breakdown Spectroscopy) for advanced optical characterization, dimensional measurement, documentation, failure analysis, and material identification. 2. A surface metrology and 3D surface characterization system for high-resolution measurement of surface geometry, surface roughness, topography, dimensional inspection, and comparison against CAD models and design specifications. They will be used for research, education and training, industrial problem-solving, product development, material selection, reverse engineering, failure investigations, quality assurance, and advanced characterization of metallic, polymeric, ceramic, composite, and emerging materials. Accordingly, the equipment shall be well suited for both academic research and industrial applications and shall be capable of supporting a broad range of current and future challenges in materials engineering, product development, and sustainable industrial transformation. The equipment is expected to contribute to strengthened collaboration between academia and industry and enable enhanced research, innovation, and development capacity for companies and higher education institutions throughout the region.
