Kriterju:

Tip: Kwalità

Deskrizzjoni: Tradebroker has chosen, in this procurement, to safeguard climate and environmental considerations through requirements in the requirement specifications, rather than using climate and environmental considerations as the award criterion, cf. the Supply Regulations § 7-9 fourth paragraph. The requirements are designed as minimum requirements and are aimed at the most central climate and environmental impacts of the service, including vehicles used in the delivery of overtime food. By setting requirements, it is ensured that all tenderers and deliveries under the contract fulfil a defined environmental level. If climate and environmental considerations were instead used as the award criteria, the contracting authority would not be able to ensure that the chosen tenderer or concrete deliveries fulfilled this level, as the price and other award criteria could be decisive. The contracting authority has assessed that the relevant requirements are relevant, proportional and possible to fulfil in the market. Based on this, it is considered clear that the climate and environmental requirements

in the requirement specifications provide a better overall climate and environmental effect than the use of climate and environmental considerations as the award criterion.
