Bærum municipality will mainly carry out uncertainty analyses itself for smaller complex projects. Depending on the initiative's extent, complexity, importance or the attention it attracts, analyses in the other phases will be relevant. The focus of the uncertainty analysis is aimed at giving a description of the uncertainties that exist in a project within time, cost and quality etc. A uncertainty analysis is very similar to a risk analysis, but it also includes positive events that can occur in the project. Furthermore, to clarify the project's total uncertainty picture with corresponding risk reducing measures. Typical buildings are purpose-built buildings such as schools, nurseries, nursing homes, sports halls, large housing projects and construction projects for environmental engineering services.
