A positive assessment will also be made if the system clearly warns of deviations, fractures or risk of breaches and if such signals are understandable and easy to follow-up. Work flow and user friendliness An assessment will be made positive if the system has an intuitive and efficient work flow for employees, managers and rota planners. Kategorija tal-kriterju tal-għoti piż: Fattur ta' ponderazzjoni (persentaġġ, eżatt)

Numru tal-kriterju għall-għoti: 60

Kriterju:

Tip: Kwalità

Isem: Environment

Deskrizzjoni: The contracting authority uses the exclusion provisions in loa § 5b third section and does not weight climate and environmental considerations in accordance with the second paragraph. The contract is assessed to have a climate footprint and an immaterial environmental impact, and this is justified below. The nature of the procurement in this case is the procurement of a KI based rota tool that shall assist with rota planning. Furthermore, the procurement involves maintenance and further development of such a tool, operation and use of the tool. The work on maintenance and further development of the tool can be compared with a consultancy service without particular travel activities and is therefore considered to have immaterial climate footprint and environmental impact. The energy consumption and any environmental impact of this system is very limited and it is aimless for the contracting authority to emphasise or set requirements in the environmental requirement specifications in this procurement. Based on this, the procurement of KI-based rota tools is assessed in accordance with immaterial climate footprint and environmental impact, and thus falls under the exception rule in loa § 5b (3).
