Kriterju:

Tip: Kwalità

Deskrizzjoni: The contracting authority safeguards climate and environment considerations through minimum requirements set out in the qualification criteria and technical specifications. Requirements for documented energy mix, climate data and guarantees of origin are included where relevant. Climate and environment are therefore not used as an award criterion. The contracting authority has chosen to use requirements rather than award criteria because this provides a better and more predictable climate effect in the power market, where all suppliers operate within the same Nordic power system and award criteria do not result in any real difference in climate outcomes. This approach is in accordance with point 6.1 of DFØ's guideline
