- Short description of the delivery, including the name of the contracting authority.
- Date of implementation.
- Scope of the delivery stated in monetary terms.

2) Documentation requirement: A description of the the system for managing the supplier chain, that the tenderer will use to carry out the contract. This includes quality assurance measures that enable systematic follow-up of the work on safeguarding basic human rights, the ILO's core conventions and the international law regulations related to the delivery in this contract, including relevant UN decisions that Norway is obliged to further down the supply chain / production process.

A description of the tracking systems that the tenderer will use to fulfil the contract. The description must state methods and/or systems that enable tracking of the production locations and country of origin involved in the supplier chain for the goods in this contract.

See Annex 2 – Guidance in social qualification requirements

See also Annex 2 c – Answer sheet for social qualification requirements. The use of the aforementioned annex is voluntary for the Tenderer, but is intended to be a support tool for documenting social qualification requirements. Tenderers are asked to be aware that the annex is only intended as support and supplementation. The response must also include an in-depth description/documentation/explanation.

3) Documentation requirement: Provide a short description of the tenderer's environmental management system.

The report must, as a minimum, contain an overview of the following:

- Routines for follow-up and updates on the company's environmental performance.
- Routines for continuous training of personnel within environmental work of significance to the contract.
- Routines that ensure compliance with the relevant environmental regulations.
- Routines for registration of follow-up of environmental events and deviations.

The environmental management system must reflect the tenderer's obligation in regards to proper handling of waste, considerate production and material choices.

Any certifications are accepted provided that they reference routines and measures for environmental objectives. The tenderer must show where in the certification these procedures and measures are described.
