The contracting authority will obtain company registration certificates from the brreg.no

Foreign companies: Proof that the company is registered in a trade or business register as prescribed by the law of the country where the company is established.

Criterium: Andere economische of financiële eisen

Beschrijving van het selectie criterium: The tenderer must have sufficient financial capacity to carry out the contract. Documentation requirements: · Credit evaluation/rating, not older than 3 months, and which is based on the last known fiscal figures. NB: The contracting authority will obtain a credit rating from CreditSafe. And/or: · The company's annual accounts or extracts thereof if the publication of the annual accounts is required in the country where the tenderer is established. NB: Norwegian companies can obtain the annual accounts for Norwegian companies from brreg.no. Foreign companies can refer to an equivalent place where the contracting authority can obtain the annual accounts without costs.

Criterium: Referenties voor gespecificeerde werken

Beschrijving van het selectie criterium: · Good experience is required from equivalent work. Equivalent work means excavation, blocking out and hose renovation in confined densely populated areas. It will be positive if the tenderer has water stocking experience, but this is not a requirement. Documentation requirements: An overview of the construction work that the tenderer has carried out in the last five years.

Criterium: Maatregelen om kwaliteit te waarborgen

Beschrijving van het selectie criterium: Tenderers shall have quality assurance measures suited to the content of the contract. Beschrijving: According to the Supply Regulations § 7-9 (2), the Contracting Authority shall emphasise climate and environment considerations with a minimum of 30% in the award criteria. There is, however, an opportunity to depart from this main rule if it is "clear that" the climate and environmental requirements in the requirement specifications provide a better climate and environmental effect, and this is justified in the procurement documents, cf. the utilities regulation § 7-9 (4) first period. There are minimum requirements in this procurement in accordance with Oslo municipality's standard climate and environmental requirements, including requirements for emission free construction sites and requirements for fuel technology for other transport. These are in the tender documentation annex 2 contract formula NS 8405 point 22. It is clear that these requirements give a better climate and environmental effect than weighting climate and environmental considerations with a minimum of 30% in the award criteria. I.a. due to conditions stated in the following. The machines where there are no requirements that shall carry out the work emission free, shall use a minimum of euro class 6/VI and documented sustainable biofuels beyond the turnover requirements. The lower threshold is biogas by transporting matter respectively and by other transport by vehicles under 3.5 tons. Other transport by vehicles over 3.5 tonnes, as a minimum, it is to use fossil free vehicles for transport that as a minimum fulfil euro class 6/VI. Bio-fuel used in the implementation of the contract shall be documented sustainable biofuels beyond the turnover requirements. By 1.1.2027, all vehicles used in the implementation of the contract must be

emission free or biogas based. In addition, climate and environmental effects are taken care of by choosing excavation free methods for rehabilitation for parts of the project, which is more consistent in the requirement specifications. However, VAV would like to award tenderers who can offer climate-friendly solutions beyond the minimum requirements, and will therefore weight climate or environmental considerations by 10%. This represents an overfilling of the procurement regulations' requirements for taking care of climate and environmental effects.
