#### 2.1. Procedure

Titel: ESM platform with a system for user enquiries - Stage 1 - Qualification

Beschrijving: The Norwegian Parliament's current system for handling user enquiries, Footprints, is nearing the end of its technological lifetime and it no longer fulfils the requirements for modern, secure and effective case handling. For the users, the current situation means that enquiries need to be directed through several different channels – such as Footprints, email, telephone, SMS and physical attendance – which creates uncertainty as to where to address, who is following up, and what the status of the case is. In order to meet these challenges, the project New System for User Enquiries was established with the aim of acquiring and introducing a modern ESM platform (Enterprise Service Management), in which a new system for user enquiries is established as the first system on the platform. An ESM platform will not only replace Footprints, but at the same time give the Norwegian Parliament a common technological foundation for several types of work processes in the long term. Thus, the project addresses both the need for a new user enquiry system and the strategic need to ensure growth when the organisation is ready for it. The aim is to use a system that is secure, scalable and based on standardised processes and integrations. The platform approach facilitates further digitalisation, better data quality and more fact-based decisions. It also supports the Norwegian Parliament's need for efficiency, automation and overall management information. Future situation When the system is implemented, the Norwegian Parliament has adopted a flexible and scaleable platform that supports user enquiries as the first process, but which is also rigged to handle several work processes over time. The platform enables gradual development where the Norwegian Parliament itself manages the tempo, at the same time that the tenderer contributes with the necessary competence for configuration, development and implementation and its best practice and experience from other customers. The system is integrated with other systems through standard APIs/connectors and it provides a joint framework for processes and data basis. This provides consistent information across your organisation, improved data quality and management information, as well as support for fact-based priorities and strategic planning. Stortingets administrasjon gets a modern, comprehensive and user friendly platform that improves both internal work flow and the experience for the users. Unified processes and a common user interface contribute to fewer

errors, better experiences and more efficient work flow. The system also facilitates increased automation and digitalisation, and over time cost reductions are achieved by having several processes gathered in one platform, as well as security and privacy strengthened and the Starting now has a strong technological foundation that can be further developed gradually, scaled as needed and used across the organisation to support future digital needs and innovation. The procurement will be carried out with SSA-Sky as the contract basis and it is assumed that the system is delivered as a standardised cloud system (SaaS). This means that functionality, further development, security and operation are mainly safeguarded through the tenderer's established service model and standard updates. The described needs are based on experiences with the current Footprints system and the established ITSM processes, while also reflecting the Norwegian Parliament's need and ambition for further development within a modern cloud based service model. The requirement descriptions cover both direct support for established ITSM processes, such as Incident, Request, Change and Problem Management, as well as transverse needs such as joint entrance, dialogue, notifications, search, reporting, security, compliance and management. Combined, the needs shall provide a flexible possibility room where processes, services and applications can be configured, combined and further developed over time, also for new needs and services that are not currently fully known. The needs are formulated as business and functional needs, and not as detailed technical specifications. This has been done so that the Tenderer can offer systems that are primarily based on standard functionality in the cloud platform, in accordance with the principles in SSA-Sky. Both the current need and new or changed needs arising in the contract period The service provider shall, in their tender, describe how the system supports the needs within the framework of an SSA-Sky delivery, including how management, security, availability and further development are safeguarded throughout the contract period. The Norwegian Parliament sees a need for a solution that also allows for development and adaptation in the contract period. The descriptions of the needs are therefore formulated technology neutral and process independent, so that they can be covered through the tenderer's standard functionality, configuration and further development - both for the current use and for new needs that may arise. Tenderers shall describe in their tender how their solution: covers the Norwegian Parliament's need in a comprehensive manner supports established ITSM processes that provide low risk, high management friendly and good further development possibilities in accordance with SSA-Sky

Einddatum van de duur: 31/10/2036

#### **5.1.6. Algemene informatie**

##### **Voorbehouden deelname:**

Deelname is niet voorbehouden.

Aanbestedingsproject dat niet uit EU-fondsen wordt gefinancierd

De aanbesteding valt onder de Overeenkomst inzake overheidsopdrachten (GPA): ja

#### **5.1.9. Selectiecriteria**

Bronnen van selectiecriteria: Uniform Europees Aanbestedingsdocument (UEA)

**Informatie over de tweede fase van een procedure in twee fasen:**

Minimumaantal gegadigden dat voor de tweede fase van de procedure moet worden uitgenodigd: 3

Maximumaantal gegadigden dat voor de tweede fase van de procedure kan worden uitgenodigd: 5

De procedure verloopt in opeenvolgende fasen. In elke fase kunnen deelnemers afvallen

De koper behoudt zich het recht voor de opdracht zonder verdere onderhandelingen te gunnen op basis van de oorspronkelijke inschrijvingen

**5.1.11. Aanbestedingsstukken**

Talen waarin de aanbestedingsstukken officieel beschikbaar zijn: Noors

Adres van de aanbestedingsstukken: <https://permalink.mercell.com/281577992.aspx>

**5.1.12. Voorwaarden van de aanbesteding**

**Voorwaarden voor indiening:**

Elektronische indiening: Vereist

Adres voor indiening: <https://permalink.mercell.com/281577992.aspx>

Talen waarin inschrijvingen of verzoeken tot deelname kunnen worden ingediend: Noors

Elektronische catalogus: Niet toegestaan

Een geavanceerd(e) of gekwalificeerd(e) elektronisch(e) handtekening of zegel (zoals omschreven in Verordening (EU) nr. 910/2014) is vereist

Varianten: Niet toegestaan

Uiterste datum voor de ontvangst van verzoeken tot deelname: 22/06/2026 10:00:00 (UTC+00:00) West-Europese tijd, GMT

**Voorwaarden van het contract:**

De uitvoering van de opdracht moet plaatsvinden binnen het kader van programma's voor maatwerkbedrijven: Neen

Elektronische facturering: Vereist

Er zal worden gebruikgemaakt van elektronische orderplaatsing: ja

Er zal worden gebruikgemaakt van elektronische betaling: ja

**5.1.15. Technieken**

**Raamovereenkomst:**

Geen raamovereenkomst

**Informatie over het dynamische aankoopstelsel:**

Geen dynamisch aankoopstelsel

**5.1.16. Nadere inlichtingen, bemiddeling en evaluatie**

Organisatie voor beroepsprocedures: Oslo tingrett

Informatie over de termijnen voor beroep: See the tender documentation and loa/FOA

Organisatie die meer informatie geeft over beroepsprocedures: Oslo tingrett
