Rechtsvorm van de koper: Overheidsonderneming

Activiteit van de aanbestedende dienst: Algemene overheidsdiensten

2. Procedure

2.1. Procedure

Titel: Purchase of treatment plant for BIR Ressurs - Mjelstad landfill

Beschrijving: BIR Resource Dep. Mjelstad (referred to as BIR) shall, in connection with the expansion of the landfill site, procure a new treatment facility for water that occurs as a result of precipitation hitting and going through the landfill. BIR shall ensure that the area and building is established where the treatment plant shall be constructed. Tenderers of the treatment plant must be responsible for the complete delivery of treatment facilities with all the accompanying equipment that is necessary for operation, as well as assembly, commissioning and training. This is further described in the tender documentation. It is important for BIR to get sufficient information about the treatment facility to facilitate with the correct dimensioned building. BIR shall procure the pumps that shall deliver water to the treatment facility and from the pump sump after the treatment plant to the recipient. It is important that BIR receives information about the interface and sets the dimensions of the treatment plant as the basis for pump capacity. As described later in KG, the landfill does not have a buffer basin and the treatment plant must be able to handle frequent changes in flow into the treatment facility based on a water level in the pump sump. Flow meters in and out of the treatment facility, in addition to flow meters on pump pipelines out to the recipient, must be delivered by the tenderer. The pump intake shall increase the signal from the treatment plant and the treatment plant shall adjust automatically to the level meters in the sump. BIR ensures that pumps are delivered in a pump sump that is controlled by a frequency transformer. The pumps will therefore communicate with the treatment plant's PLC, which shall be delivered by the tenderer. Further information on pumps and pump sump can be offered by BIR on request.

Identificatiecode van de procedure: 143aaa37-0d5a-4c60-b6fa-13a5168a0a40

Interne identificatiecode: BIRRA-0626

Type procedure: Onderhandelingsprocedure met voorafgaande oproep tot mededinging / mededingingsprocedure met onderhandeling

De procedure wordt versneld: neen

2.1.1. Doel

Aard van het contract: Leveringen

Belangrijkste classificatie (cpv): 42996000 Machines voor de afvalwaterbehandeling

2.1.2. Plaats van uitvoering

Postadres: Hjelvikvegen 286

Stad: Valestrandsfossen

Postcode: 5281

Onderverdeling land (NUTS): Vestland (NO0A2)

Land: Noorwegen

2.1.3. Waarde

Geraamde waarde exclusief btw: 12 000 000,00 NOK

2.1.4. Algemene informatie

Rechtsgrondslag:

Richtlijn 2014/24/EU

2.1.6. Gronden voor uitsluiting

Bronnen voor uitsluitingsgronden: Aanbestedingsstuk

5.1.1. Doel

Aard van het contract: Leveringen

Belangrijkste classificatie (cpv): 42996000 Machines voor de afvalwaterbehandeling

Aanvullende classificatie (cpv): 90420000 Rioolwaterbehandelingsdiensten

5.1.2. Plaats van uitvoering

Postadres: Hjelvikvegen 286

Stad: Valestrandsfossen
Postcode: 5281
Onderverdeling land (NUTS): Vestland (NO0A2)
Land: Noorwegen

5.1.3. Geraamde duur

Looptijd: 48 Maanden

5.1.5. Waarde

Geraamde waarde exclusief btw: 12 000 000,00 NOK

5.1.6. Algemene informatie

Voorbehouden deelname:

Deelname is niet voorbehouden.

Aanbestedingsproject dat niet uit EU-fondsen wordt gefinancierd

De aanbesteding valt onder de Overeenkomst inzake overheidsopdrachten (GPA): ja

Deze aanbesteding is ook geschikt voor kleine en middelgrote ondernemingen (kmo's): ja

5.1.9. Selectiecriteria

Bronnen van selectiecriteria: Aanbestedingsstuk

Informatie over de tweede fase van een procedure in twee fasen:

Minimumaantal gegadigden dat voor de tweede fase van de procedure moet worden uitgenodigd: 3

De procedure verloopt in opeenvolgende fasen. In elke fase kunnen deelnemers afvallen

De koper behoudt zich het recht voor de opdracht zonder verdere onderhandelingen te gunnen op basis van de oorspronkelijke inschrijvingen

5.1.10. Gunningscriteria

Criterium:

Type: Kosten

Naam: Total cost

Beschrijving: The total cost is calculated from the completed price form and will make up the sum of the completed yellow fields * with events. stated volume estimate

Categorie van het gunningscriterium gewicht: Gewicht (percentage, exact)

Gunningscriterium numerieke waarde: 40

Criterium:

Type: Kwaliteit

Naam: Environmental considerations

Beschrijving: Chemical and water consumption. See kg chapter 12.3

Categorie van het gunningscriterium gewicht: Gewicht (percentage, exact)

Gunningscriterium numerieke waarde: 30

Criterium:

Type: Kwaliteit

Naam: Quality

Beschrijving: 1 The degree to which the offered treatment plant has functionality, technical qualities and operational qualities will be evaluated, which ensures stable, efficient and robust cleaning of fresh water from the landfill over time. The evaluation will include the following 5 points with the accompanying weight in %: 1. Documented cleaning effect for relevant parameter groups in ladder water with a focus on: a) documented reference installations and any test results b) quality and relevance of the presented documentation c) Degree of documented stable cleaning effect over time The punk is weighted 5 % 2. Technical solution and suitability for treating leachate from a landfill site that primarily deposits bottom ash and

inorganic matter. a) Documented process and function description. A detailed description of the mode of operation in the different stages in the process from the incoming to the completed cleaned ladder water, including the function of all input factors. A description shall be enclosed of how residue products are generated and typical characteristics of the residue product b) Quality and relevance of the presented documentation c) Option for capacity expansions and integration of new cleaning stages or technologies d) Redundancy and back-up capacity in critical process links e) Handling varying amounts of fresh water and concentrations. A buffer basin for ladder water is not planned and the installation must automatically handle varying amounts of ladder water. f) The treatment plant must be able to run 24 hour on both weekdays and weekends. BIR needs a treatment facility that is easy to operate and requires little follow-up. This is due to a low and efficient manpower structure and the treatment facility shall be fully operative in a long term post-operation phase when the landfill site is closed in the future. During normal operation, the treatment plant shall not require refilling chemicals or emptying residue products outside normal working hours. The point is weighted 7 %

3. Operational reliability, event. risk factors and running time with a spotlight on: a) Description of the 24 hour operation of the treatment plant on weekdays and weekends and how operation on weekdays enables operation during nights and weekends without supervision. b) Emphasis will be put on how the treatment plant's functionality and reliability will be at varying temperatures and humidity where the installation is installed (always frost-free inside the treatment building). A description must be provided of how the treatment plant functions under varying conditions (typical temperature and humidity). c) A plan shall be delivered of a need for manpower from BIR's side during daily operations as well as which service assignments can be carried out by BIR's own employees. In addition, tenderers shall specify stipulated working hours for operational personnel at BIR for operation of the plant over a working week (Monday - Friday between 07:00 and 15:00). The point is weighted 7 %

4. Degree of automation and monitoring with a spotlight on: a) The type of control system must be documented, including how monitoring, following up operations and logging are done. b) The control system and treatment plant (total delivery) shall have a guaranteed running time of minimum. 95% on a weekly basis year round outside of the planned service in accordance with the service contract. The plan for maintaining uptime must be described. c) A delivered control system shall be described that enables digital remote monitoring/operation without having to be physically present at the treatment plant. Both tenderers and BIR shall have access. d) The delivery shall include a complete control system for the treatment plant, including, but not limited to: PLS, I/O, signal processing, network infrastructure, connection, programming, testing and commissioning. e) The control system shall as a minimum have the following qualities: Access via a cloud system for connection independent of location. Have functionality and qualities that mean that BIR can control process units itself, correct error messages, alarms etc. The point is weighted 5 %

5. Reference assignments with a spotlight on: a) During the last 4 years (2021-2026), tenderers must have carried out 2 assignments with equivalent content set against the assignment in the present procurement. The description shall include the name of the contracting authority, the contracting authority's gender neutral preferred with email and mobile number, value of the delivery as well as the date of the delivery. In addition the delivery services shall be described in regard to content and extent. The point is weighted 6 %

In order to verify and check the received information for the given reference customers, BIR reserves the right to the following: Control information including having dialogue and negotiations with the Tenderer (including information the tenderer has provided under the quality criteria in this table) Search and check tender information on the general market basis. Contact the stated references as well as other actors who can provide useful information. The stated reference systems and reference customers will be emphasised. Information of a confidential/sensitive nature will not be requested.

Categorie van het gunningscriterium gewicht: Gewicht (percentage, exact)

Gunningscriterium numerieke waarde: 30

5.1.11. Aanbestedingsstukken

Adres van de aanbestedingsstukken: https://eu.eu-supply.com/app/rfq/rwlenrance_s.asp?PID=457289&TID=200417879&B=

5.1.12. Voorwaarden van de aanbesteding

Voorwaarden voor indiening:

Elektronische indiening: Vereist

Adres voor indiening: https://eu.eu-supply.com/app/rfq/rwlenrance_s.asp?PID=457289&TID=200417879&B=

Talen waarin inschrijvingen of verzoeken tot deelname kunnen worden ingediend: Noors

Elektronische catalogus: Niet toegestaan

Uiterste datum voor de ontvangst van verzoeken tot deelname: 04/09/2026 10:00:00 (UTC+00:00) West-Europese tijd, GMT

Voorwaarden van het contract:

De uitvoering van de opdracht moet plaatsvinden binnen het kader van programma's voor maatwerkbedrijven: Neen

Elektronische facturering: Vereist

Er zal worden gebruikgemaakt van elektronische orderplaatsing: ja

Er zal worden gebruikgemaakt van elektronische betaling: ja

5.1.15. Technieken

Raamovereenkomst:

Geen raamovereenkomst

Informatie over het dynamische aankoopstelsel:

Geen dynamisch aankoopstelsel

5.1.16. Nadere inlichtingen, bemiddeling en evaluatie

Organisatie voor beroepsprocedures: Hordaland Tingrett
