contract applies if this information is relevant and available. This requirement only applies to

companies where the publication of annual accounts is not required in the state where the

company is established. and Credit evaluation/rating, not older than 3 months, and which is

based on the last known fiscal figures. NB: The contracting authority will obtain a credit rating

from CreditSafe.

Criterion: Andere economische of financiële eisen

Beschrijving van het selectiecriteria: • Experience is required from projects of an equivalent nature and degree of difficulty. By an equivalent nature and degree of difficulty, we mean blocking and digging in densely populated areas. Documentation requirements: • An overview of the construction work that the Tenderer has carried out in the last five years. If necessary to ensure sufficient competition, the contracting authority can also accept documentation of relevant building and construction work carried out more than five years ago.

Criterion: Andere economische of financiële eisen

Beschrijving van het selectiecriteria: • Tenderers shall be suitable to fulfil the contractual requirements for due diligence assessments for responsible businesses within 3 months of the contract being signed. This means that the Tenderer has implemented measures and systems that are used in the Tenderer's work to safeguard basic human rights and decent working conditions, as well as prevent environmental degradation and corruption. Documentation requirements: • A description of the tenderer's systems for working with due diligence assessments in accordance with the UN's guiding principles for business and human rights (UNGP) and OECD's guidelines for multinational companies. The documentation shall include: • Formal policy/guidelines that cover an obligation to comply with the requirements of responsible businesses. • Formal policy/guidelines for accountability for sub-suppliers/the supplier chain, (Supplier Code of Conduct). This shall only be provided if sub-suppliers are used. • Descriptions of the tenderer's processes and routines for how the company works with due diligence assessments. • Description of how the tenderer will obtain and maintain an overview of the country of origin and production locations for the products that the tenderer offers. This shall only be delivered if the procurement includes goods.

5.1.10. Gunningscriteria

Criterion:

Type: Prijs

Beschrijving: Price

Categorie van het gunningscriterium gewicht: Gewicht (percentage, exact)

Gunningscriterium numerieke waarde: 70

Criterion:

Type: Kwaliteit

Beschrijving: Assignment comprehension The following is a list that is not exhaustive over points that the contracting authority will consider in the assessment: • Central risks/possible challenges in the project and how these are intended to be solved. • Traffic management /access in the construction period, particularly the crossing Hellerudveien/Eftasåsen. • Blasting and piggig of rock in densely populated areas, and near cable posts and transformer station and how this should be taken into account. • Handling the local environment with regard to neighbour contact, site noise, site dust, vibrations and vibrations. The contracting authority will emphasise concrete, precise and binding descriptions of how identified challenges are handled, rather than general and general systems. Progress plan • The project's individual phases and phase plans • Main activities

Categorie van het gunningscriterium gewicht: Gewicht (percentage, exact)

Gunningscriterium numerieke waarde: 30

Criterion:

Type: Kwaliteit

Beschrijving: 1.1.1 EXCEPTION FROM WEIGHTING THE ENVIRONMENT The contracting authority has assessed the use of climate and environmental considerations in light of the

utilities regulations §7-9 in this procurement. The main rule in accordance with §7-9 second paragraph is that climate and environmental considerations shall be weighted with a minimum of 30 percent in the award criteria. Pursuant to §7-9 fourth paragraph, however, the award criteria can be replaced with climate and environmental requirements in the requirement specification, if it is clear that this gives a better climate and environmental effect, and this is justified in the procurement documents. The contracting authority has made a concrete assessment of the nature and execution of the relevant procurement, and it is assumed that the climate and environmental impact is mainly related to how the construction work and the accompanying transport are actually carried out, including the use of machines and vehicles. Furthermore, it is considered that binding minimum requirements in the requirement specifications provide a more predictable and safe reduction of emissions than the use of award criteria alone, as the requirements apply during the entire contract, independent of the tender evaluation. Oslo municipality's standard climate and environmental requirements for building and construction procurements have form the basis for the contract. There are minimum requirements regarding emission-free execution of the construction work, including that all work at the building and construction site shall be carried out emission free of charge. The contractor shall only use vehicles/means of transport, which are either emission free or biogas based in the execution of the contract, for mass transport and other transport. All relevant environmental performance is therefore regulated as an absolute minimum requirement, which safeguards climate and environmental considerations in the best possible way.
