#### 2.1.4. Algemene informatie

Aanvullende informatie: As part of the application, economic operators must ensure that a duly completed version of the European Single Procurement Document (ESPD) is submitted. The ESPD is the economic operator's 'selfdeclaration' serving as preliminary evidence that the economic operator is not subject to the mandatory and, if selected, voluntary grounds for exclusion and meets the requirements for suitability. The grounds for exclusion are stated in the present contract notice. Economic operators covered by the included exclusion grounds may only participate in the tender if documentation of reliability is presented, cf. section 138 of the Public Procurement Act. The Public undertaking will request a "Serviceattest" (<https://erhvervsstyrelsen.dk/serviceattestvedudbud>) as documentation supporting that economic operators are not subject to the exclusion grounds specified in section 135, paragraph 1, 2, and 3 and section 137, paragraph 1, no. 2 of the Public Procurement Act. If the economic operator originates from another Member State, they must provide equivalent documentation in the version and/or from the authorities relevant in that Member State. The Public undertaking reserves the right at any time to request an applicant or tenderer to submit

documentation if necessary to ensure that the procedure is carried out correctly. The EU sanctions against Russia entail that economic operators subject to EU sanctions under EU Regulation no. 833/2014 as amended, article 5k, are excluded from participating in the tender. By submitting an application, the applicant confirms not to be subject to this. Conditions for participation in the form of consortia or through the use of supporting entities are described in the Tender Material. The Public undertaking reserves the right to complement, supplement, or complete applications and tenders. Further information is available in the instruction to the qualification system, which can be found at Comdia.

Titel: Kvalifikationssystem for BESS (Battery Energy Storage System)

Beschrijving: BeGreen has established a qualification system for future tenders related to projects within the field of BESS (“Battery Energy Storage System”) in relation to the development of solar parks. This qualification system is established according to Council Directive 2014/25/EU of 26 February 2014 (the “Utilities Directive”). The qualification system is unlimited in duration and will only cease when BeGreen decides to terminate it, which will be announced in TED. An economic operator who applies for the qualification system is considered an “applicant”, whereas a qualified economic operator who is invited to participate in a specific tender is considered a “tenderer”. Only the economic operators qualified to be part of the qualification system at the time of call for tender will be considered in the selection of tenderers. Qualification is therefore a prerequisite for participation in future tenders, but it cannot be regarded as a guarantee of either participation in these tenders or the award of future contracts. The Public undertaking thus reserves the right to conduct tenders independently of this qualification system. The Public undertaking will, when call for tender is made, award contracts or framework agreements above the threshold value according to the procedures defined in articles 46 and 47. For procurements below the threshold value, the Public undertaking will outline the procedure in the Tender Material. The process leading to the selection of tenderers is stated in the Instructions for the qualification system, which can be found in Comdia.
