Documentation requirements: A description of the tenderer's quality assurance methods. Alternatively: Certificate for the company's quality assurance system issued by independent bodies that confirms the tenderer fulfils certain quality assurance standards, for example ISO 9001:2015.

Criteriu: Măsuri de management al mediului

Descrierea criteriului de selecție: Tenderers are required to have implemented environmental management measures that ensure that the tenderer is suitable to fulfil the contract's environmental provisions (see point 9 in the contract). This means that the tenderer has methods for working actively and systematically to reduce negative environmental impact from activities connected to the execution of this contract. Documentation requirements: A description of the tenderer's environmental management measures. If a tenderer has certificates from independent bodies that document the environmental management system, they can be presented as documentation. Refer to the EU Scheme for Environmental Management and Environmental Audit (EMAS), other recognised environmental management systems in regulation (EF) no. 1221/2009 article 45, or equivalent, and other environmental management standards based on relevant European or international standards from accredited bodies such as ISO 14001 or equivalent.

Criteriu:

Tip: Calitate

Descriere: The contracting authority is obliged, in accordance with the Public Procurement Act § 5, to align its procurement practice so that it helps reduce damaging environmental impact and promote climate-friendly solutions when relevant. Furthermore, the Public Procurement Regulations § 7-9 second paragraph states that the contracting authority shall, as a general rule, weight climate and environmental considerations with a minimum of 30%. Exceptions can be made in accordance with § 7-9 fourth section if it is clear that the minimum requirements in the requirement specifications will provide a better climate and environmental effect. Oslo municipality's standard climate and environmental requirements are based on a main rule that all transport shall be carried out by electric bicycle or vehicles that are either zero emission (i.e. 100% battery electrical or hydrogen) or biogas vehicles that as a minimum fulfil euro class 6 /VI in the execution of the contract (last transport stretch/cargo mile). In this procurement, there is a minimum requirement that all transport shall be carried out with vehicles that are 100% zero emission, i.e. vehicles that are 100% battery electrical or hydrogen powered. There are also requirements for a minimum of 95% sorting degree for waste. In this contract, the Agency for Real Estate and Urban Renewal has set minimum requirements for climate and environmental considerations, which, according to the contracting authority's assessment, clearly give a better overall climate and environmental effect. The contracting authority has, thus, chosen to emphasise climate and environmental considerations by 25%. By setting absolute minimum requirements for the transport and sorting degree in the contract, in combination with award criteria, a guaranteed climate and environmental effect is ensured on the procurement's total climate footprint. This gives a clearly better climate effect compared to only using climate and environmental considerations as the award criterion as a certain minimum level is ensured.
