Tip de procedură: Negociată cu publicarea prealabilă a unei proceduri concurențiale de ofertare / competitivă cu negociere

Procedura este accelerată: nu

Principalele caracteristici ale procedurii: The competition will be held in two stages. The competition begins with a qualification phase (stage 1). Only tenderers who fulfil the qualification requirements and who have been invited will be able to submit a tender. The contracting authority plans to invite 3-5 of the qualified tenderers to submit a tender (phase 2), provided that there are a sufficient number of qualified applicants. If there are more qualified

applicants than the number the contracting authority plans to invite to submit a tender, the contracting authority will choose among the qualified tenderers on the basis of the selection criteria in point 5, if there is a Requirement of Experience. All invited tenderers will have their tenders evaluated. Following the negotiations and any updated tenders, the final evaluation will be made and the contract will be awarded. The contracting authority reserves the right to award the contract without negotiations, cf. the Public Procurement Regulations § 23-7 (5).

2.1.4. Informații generale

Informații suplimentare: In accordance with loa § 5b, climate and environmental considerations shall as a main rule be weighted with a minimum of 30% in the award criteria. The award criteria after the first and second periods can be replaced or combined with climate and environmental requirements in the requirement specifications if this gives a better climate or environmental effect. The procurement is for a cloud based service, where the operation of the data centre is assessed to be responsible for most of the climate and environmental impact. The contracting authority has carried out a market mapping of which data centre potential tenderers use, including locations, as well as how these data centres affect climate and the environment. Either a computer centre is used from industry-leading suppliers such as Microsoft and Amazon, who have come a long way in their efforts to reduce climate and environmental impact, or their own computer centre in Norway. The market is considered mature. The data centres are largely based on renewable energy. The contracting authority has determined that setting the minimum requirements for PUE (Power Usage Effectiveness) and REF (Renewable energy Factor) gives a better effect than using climate and environment as the award criteria in this procurement.
