The decision for awarding and contracting will be taken within the context of the negotiations. The awarding of the contract is not subject to the award decision by the selection committee. The proposed architectural solution is one of several award criteria. The decision to award the contract is based on the following project-related criteria: -Proposed solution/Concept plans: Creative ability and approach to the task at hand (proposed solution/concept plans) Economic efficiency and feasibility of the concept idea Weighting 40% - Project management: Involvement of the locally based planning office, methods of schedule control/cost control, methods of quality assurance, on-site presence, weighting 40% - Fee offer: Weighting 20% Multiple applications as a subcontractor/sub-planner are generally possible. However, bidders and members of a bidding consortium may not simultaneously apply as general planners and subcontractor/sub-planner in separate applications. Multiple applications or participation as a general planner will lead to exclusion. Specialist engineers, consultants and local architects or architecture firms may apply in more than one general planning team if they do not act as authorized representatives. If subcontracts are awarded and the applicant invokes the capacities of the other enterprise with regard to the required economic, financial, technical and professional capacity pursuant to § 45 and § 46 VgV, he or she must prove that the necessary resources are actually available to him or her and that there are no reasons for exclusion with regard to this enterprise (for example, by means of a corresponding declaration of commitment by the subcontractor).
