Ime: Climate and environment

Opis: There is no requirement for 30% weighting of climate and environmental considerations. The contracting authority can replace climate and environmental considerations in the award criteria with climate and environmental requirements in the requirement specification, if it is clear that this gives better climate and environmental effect. Several different requirements are made in the requirement specification, including: - All areas that must be developed shall have an asphalt-EDP that is lower than 90 kg/tonne in accordance with NS-EN 15804+A2:2019. - Charging stations shall be established for electric lorries. - Cleaning shall be carried out with environmentally friendly products. It has been considered that the effect of setting these requirements (especially the first two hyphenated points) gives a better effect than a possible achievement, if they were used as the award criteria. The requirements and effectiveness of the above requirements are, in our opinion, sufficient to use the exception in PPR § 7-9 (4).
