2.1. Postopek

Naslov: Consulting engineers, and associated services etc.

Opis: We must republish due to a change of supplier. This publication will take place after the old invitation published on Consulting Engineers, and Associated Services etc. | See the attached documents for complete information on dynamic procurement system. Tenderers who are approved in the EU supply notice will be moved over to the new scheme. New applications must be submitted in this competition. Agder fylkeskommune (the contracting authority) invites interested tenderers to apply for admission in a dynamic procurement scheme (DIO) for consultancy engineering services, and associated services etc. See point 2.2 for a trade overview. Associated units that shall be on option: · Agder kollektivtrafikk AS · Arkivsenter Sør IKS · Aust-Agder Museum and Archives IKS · Vest-Agder museum IKS

Description The aim of the scheme is to ensure assistance for the contracting authority, both professionally and process wise for projects if the contracting authority does not have the capacity to carry out the work itself. The need will mainly be within consultancy and engineering design services in projects, for example sketch phases, preliminary projects, zoning plan with technical detailed plan, construction plan with tender documentation, as well as follow-up in the construction phase. In cases where the contracting authority carries out projects itself, the scheme can be used to request individual subjects and/or further capacity if the contracting authority cannot cover the need in their own organisation. Agder county shall be able to hold mini competitions across the organisation in the relevant categories. Some of the disciplines are overlapping, but chosen to be placed under one category or the other. Exception from this DIO: The previous Department for Development Road, with the sections Development Road West, Resource and Development Road East, which are now reorganisations to the Road Resources and Road Development departments have a separate DIO that covers the following areas: See the attached documents for a complete description of the dynamic purchasing system. Scope of consultancy engineering services This scheme shall cover consultancy engineering services within the disciplines below in the table. Most of the engineering services are within these disciplines. If it turns out that we need consultancy engineering services in other disciplines and we do not have a framework agreement for the disciplines, we reserve the right to announce a mini competition among the qualified tenderers in the DIO scheme. See the attached documents for a complete description of the dynamic purchasing system. Competitions under the scheme Under the scheme, both assistance under

the customer's management and concretely defined and limited assignments can be competitive with mini competitions. All qualified tenderers within the scheme will receive the tender documentation. If procurements are needed under the scheme, a tender documentation will be prepared that describes the contracting authority's needs, requirements and contract terms for the service as well as award criteria. The tender documentation will be distributed via EU-supply to all tenderers included in the scheme. The tender deadline will be at least 10 days. NS8401, NS8402, NS8403 and NS8404 with any additions and amendments will form the basis for the competitions that are carried out in the scheme. Other relevant NS standards can be applied to the actual assignment if they are more appropriate. When holding competitions, the contracting authority will base the award of contract on the basis of one of the alternatives below: a) Lowest price b) The lowest cost or c) The best relationship between price/cost and quality where quality is evaluated according to the following criteria: 1. CVs for the offered personnel with up to 5 relevant reference projects. 2. Delivery Description The award criteria and their weight/prioritisation will be clarified in each tender documentation, as they must be adapted to the need that will form the basis for each mini competition. Notification of contract award will be given to all participants in the relevant competition. The waiting period for awarding contracts under dynamic purchasing schemes is not required. The competition results will be published.

Vrsta postopka: Omejeni postopek

Postopek je pospešen: ne

Glavne značilnosti postopka: All can apply for participation, but only a selection of qualified tenderers will be invited to submit a tender. The actual tender phase will occur without a dialogue or negotiation beyond minor clarifications and corrections of the tenders. Tenderers are strongly encouraged to follow the instructions given in this tender documentation with annexes and possibly ask questions about uncertainties in the communication module in Hyrr.
