Naslov: Design, Manufacture, Supply and Installation of the Liquid Nitrogen (LN2) Transfer Line System for the Super-FRS Experiment Area

Opis: The tender covers the design, manufacture, supply, installation and testing of a vacuum-insulated liquid nitrogen transfer system for the Super-FRS experiment area at FAIR/GSI in Darmstadt, Germany. The base scope comprises approximately 200 m of transfer line connecting the tank area to HI/DESPEC and FHF1, including two valve boxes with manual, pressure-relief and 24 V solenoid valves. A separately callable option comprises approximately 120 m of additional transfer line and one valve box for FHF2, with provision for this extension included in the base design. The system shall deliver 25 l/min of LN2 at a nominal temperature of 77 K, with a tank pressure of 1.3 bara and at least 1.1 bara remaining at the farthest consumer. The contractor's scope includes thermal and hydraulic calculations, supports and thermal contraction compensation, applicable AD 2000 and PED compliance, factory and site acceptance testing, and technical documentation; the storage tanks and valve control system and wiring are excluded. Installation is provisionally targeted for completion by the end of Q3 2027, subject to confirmation.

Vrsta: Kakovost

Ime: Delivery schedule concept

Opis: The tenderer must submit a robust and traceable schedule concept. If the tenderer is not
already working on the FAIR construction site, it is recommended to allow approximately two
months for initial company registration on site. The tenderer must describe its experience on
comparable major construction sites and explain how this experience is reflected in the
schedule. Planned delivery dates for all materials and the personnel resources to be deployed,
including staffing levels, qualifications and duration of deployment, must be specified in detail.
If the proposed schedule deviates from the framework requirements in the tender specification
or cannot meet them, a clear written justification must be provided. Overall, the concept must
demonstrate realistic, traceable and risk aware planning.

Ime: Technical design

Opis: Pressure drop, heat input and pipe sizing. The concept should explain how these
aspects interact and how the selected dimensions meet the specified operating requirements.
Assumptions and calculation results should be traceable. A coherent design supported by

calculations for the relevant operating conditions is assessed particularly positively. Pipe dimensions should be justified through a balanced assessment of pressure drop and heat input. Clearly stated boundary conditions, realistic allowances and consistency between calculations and the proposed design make the concept convincing. Low pressure drop and low heat input are favourable where they are demonstrated under comparable conditions and remain compatible with the specified requirements.

Ime: Installation and execution concept

Opis: Routing, supports, fixed points and expansion joints. The concept should show how the line can be installed and how these elements work together, taking account of installation space, accessibility and thermally induced movements. Clear routing and support drawings, well justified fixed point locations and a coherent expansion compensation arrangement are assessed particularly positively. A feasible installation sequence, accessible connections and inspection points, and clear coordination of interfaces strengthen the concept. The proposed arrangement should explain how loads and thermal movements are accommodated without conflicts between the routing, supports and expansion joints.

Informacije o rokih za revizijo: The competent investigating authority is as follows

Vergabekammer des Bundes Villemombler Str. 76 D-53123 Bonn, Germany Tel.: 0228 9499-0

Fax: 0228 9499-163 Email: vk@bundeskartellamt.bund.de Web: <http://www.bundeskartellamt.de/SharedDocs/KontaktDaten/DE/Vergabekammern.html>

The applicant is requested to clearly identify those parts of the request to participate (and any subsequent bid) containing company /business secrets. If this does not happen, the public procurement tribunal will assume consent to inspect the documents as required in the case of carrying out a review procedure (Section 165 (3) Act against Restraints of Competition (Competition Act - GWB)). As the awarding authority, FAIR is required to provide the public procurement tribunal with immediate access to the files when a review procedure is initiated (Section 163 (2) sentence 3 GWB). Applicants/bidders have the right to demand that the Contracting authority comply with the provisions on the award procedure protecting bidders (Section 97 (6) GWB). Applicants /bidders with an interest in the public contract who believe their rights have been violated by non-compliance with the provisions governing the awarding of public contracts, must raise an objection about the violation to FAIR within ten calendar days (Section 160 (3) sentence 1 no. 1 GWB). Violations known from the tender notice or tender documents must be claimed vis-a-vis FAIR before the time limit given for submission of applications (offers) (Section 160 (3) 1 No. 2 - 3 GWB). If FAIR informs the applicant/bidder that it is unwilling to redress the objection, an application for review may then be filed with the public procurement tribunal above within 15 days of receipt of the notification (Section 160 (3) sentence 1 no. 4 GWB). Bidders whose bids are not to be considered for the award of the contract will be notified before the awarding of the contract pursuant to Section 134 GWB. A contract may only be concluded 15 calendar days after FAIR has sent out this information. This period is ten calendar days when transmission is by fax or email. The period commences on the day following the dispatch of the information by FAIR. After this time period has expired, an award is possible even if a time limit pursuant to Section 160 (3) GWB has yet to expire. Therefore, in order to prevent an

award, a request for review needs to have been served upon FAIR by the public procurement tribunal before the expiry of the time limit under Section 134 GWB. Pursuant to Section 135 (1) and (2) GWB, the invalidity of an award can only be established if it has been asserted in the review procedure within 30 calendar days from the date on which there was notification on the conclusion of the agreement, though no later than six months after the agreement was concluded. If the Contracting authority published the tender notice in the Official Journal of the European Union, the time limit for claiming ineffectiveness shall expire 30 calendar days after the publication of the tender notice in the Official Journal of the European Union.
