2.1. Förfarande

Titel: P 01-26 Prequalification - Knowledge power - decision support for Norwegian municipalities.

Beskrivning: About the procurement Stimulab project Kunnskapskraft - decision support for Norwegian municipalities shall explore how municipalities can get better support to find, understand, assess and utilise knowledge in decisions on health, care and public health measures. The project shall particularly be based on the needs of employees who prepare decision basis, municipal managers and local politicians. The ambition is to develop systems that contribute to a knowledge based decision-making and prioritising culture in the municipalities by enabling knowledge to reach and be in use. Information/tips for suppliers Stimulants is earmarked for the procurement of competence in the market. For those who are, or would like to become a supplier for Stimulab projects, read more about tips, information and previously asked questions here: <https://www.digdir.no/stimulab/leverandorer-til-stimulab/1885> For further information on this Stimulabance procurement, see the attached documents in Mercell.

Förfarandets viktigaste kännetecken: A brief summary of the procurement Norwegian municipalities are faced with demanding priorities in the health, welfare and public health field. To develop sustainable services and initiatives, municipalities need access to relevant knowledge that can be used as a basis for decisions. Today, knowledge is often fragmented, difficult to access and demanding to assess and apply in practice. At the same time, we know too little about what it takes for knowledge to actually be used and that it will have a impact in municipal decision-making and prioritising processes. The Norwegian Institute of Public Health (FHI) has been given an assignment from the Ministry of Health and Care Services to develop a knowledge support system for the municipal health and care services. This work shall be seen in connection with the establishment of the municipalities' collaboration arena for research (KSF), a national commitment led by KS in order to i.a. strengthen the spreading,

assessment and use of research and innovation in the municipalities. The Stimulab project Kunnskapskraft - decision support for Norwegian municipalities shall contribute to these objectives. The project project name is Kunnskapskraft - decision support for Norwegian municipalities. Responsible company (project owner) Hans Olav Mebiolog, Acting Director Area for Health Services, Public Health Institute Project Manager Mari Molvik, Chief Physician, Specialist in Social Medicine, Area for Health Services, Norwegian Institute of Public Health. All Stimulab projects shall follow the triple diamond and the tenderer must offer competence in the execution of all the diamonds, even if we do not know what the delivery is at the start of the project. The diagnosis phase will reveal what the delivery will be and how far the implementation will take. Since the project is a part of Stimulab, it shall have an open and experimental approach and it has therefore not been given in advance what the concrete delivery in each project will be. But the projects shall result in an anchored and committed system that is either implemented or shall be implemented, or a platform for further development. This will depend on the project's complexity and size and will be uncovered in more detail in the diagnosis phase. Budget: NOK 3,050,000 + an option for up to NOK 3,050,000. NOK 3,050,000 excluding VAT. Duration of the agreement The agreement will probably have a duration of up to 12 months. Automatic extension after the end date The contract will be automatically extended by six, 6, months after the end date, unless the Customer notifies the tenderer in writing that it will not be extended. In this period the Customer will assess whether the options shall be used. Option for further extensions of the contract Unden has the right to extend the contract for up to 24 months and set a new end date. The Contracting Authority will notify extensions in writing at least 1 month prior to the end date.

2.1.4. Allmänna upplysningar

Kompletterande information: The nature of the procurement is consultancy services, including "design competence" and "other relevant additional competence" where the main competence lies within service design, which is typically carried out as desk work. The work can include some, but typically limited travel activities. The main service is the consultant's work effort. In order to map the climate footprint and other forms of environmental impact from the nature of consultancy services, the Directorate assumes that a consultant's climate footprint and environmental impact will be equal to the load from an average permanent employee. In the view of the Directorate, it is the employee's need for office space and equipment, the energy consumption in the building where jobs are in, travel for work, and waste generation that contributes to the employee's climate footprint and environmental impact. However, the Directorate estimates that none of the above elements fall within the nature of the procurement, which is a consultancy service. The elements that are related to the species, i.e. assistance with design competence that is provided, lead to an immaterial climate footprint and environmental impact. Based on its assessment, the Directorate will use the exception in the Procurement Act § 5b third section, because the procurement is justified in its nature to

have an immaterial climate footprint and environmental impact. The Directorate is therefore exempted from the obligation to weight climate and environmental considerations with a minimum of 30 percent or to prioritise climate and environmental considerations among the three highest prioritised award criteria.
