Titel: 10040388-Consulting Services for Fostering a Just Transition in the Mexican Industrial Sector

Beskrivning: The project "Supporting a Just Transition in Mexico" aims to strengthen the capacities of key public, private and civil society actors to design and implement socially just decarbonization processes in strategic sectors of the Mexican economy, with a particular focus in key industrial (incl. industrial parks) and the energy sector. The project is commissioned by the German Federal Ministry for Economic Cooperation and Development (BMZ) and implemented by GIZ, with the Mexican Ministry of Economy (SE) as technical partner. It contributes to the BMZ core theme "Climate and energy", to Mexico's implementation of the Paris Agreement and Agenda 2030 SDGs 13, 9, 7, 5, 16 and 17. Mexico's export-oriented industrial model, the rapid expansion of industrial parks and rising energy demand create pressure and opportunities for low-carbon transformation. Building on the updated climate targets set out in Mexico's Nationally Determined Contribution (NDC), the country faces the challenge of turning these commitments into coherent implementation. Regulatory gaps, insufficient technical and financial capacities, and social and gender inequalities still limit progress towards a decarbonised economy. The project responds to these challenges by promoting an integrated approach that combines climate protection, industrial competitiveness and social justice. The overall objective is to strengthen the capacities of key actors to implement just transition processes in strategic sectors of the Mexican economy. To achieve this, the project supports the development of participatory governance frameworks for a just transition. Multistakeholder dialogue formats will foster coordination between federal and subnational authorities, the private sector, financial institutions, workers' representatives and civil society organisations. At the meso and micro levels, the project aims to improve the enabling conditions for the adoption of green technologies by companies and industrial parks in selected sectors. This includes technical and economic feasibility studies, advisory services on energy-efficient and renewable energy solutions, and targeted capacity development for park operators, firms and service providers, with special attention to SMEs and the qualification of women and groups in vulnerable situations for future-oriented jobs. In addition, the project works with public development banks and other financial institutions to align their product portfolios with the needs of companies and park operators investing in green

technologies and sustainable infrastructure. Together with these actors, it promotes demand-oriented "just transition finance" instruments that are consistent with Mexico's emerging sustainable finance taxonomy and that can be deployed in and around industrial parks, among other industry sectors. The project also supports the design and implementation of social and gender justice strategies in at least one subnational context. Together with public institutions, private sector actors and social partners, it will pilot mechanisms to identify and mitigate negative social impacts of industrial transformation, and to ensure that women and other groups in vulnerable situations benefit from new economic opportunities. Lessons learned will be documented and shared with key institutions across the country to enable replication in additional industrial parks and regions. By 2028, the project expects that several just transition-oriented policy and regulatory instruments have been adopted; that industrial parks and companies in prioritised sectors have taken investment decisions leading to measurable GHG emission reductions; that financial institutions provide suitable financing instruments for such investments; and that institutions in other regions make use of the experience gained with social and gender justice approaches in the Mexican just transition. The project is implemented from October 2024 to September 2028.

Titel: 10040388-Consulting Services for Fostering a Just Transition in the Mexican Industrial Sector

Beskrivning: Under the framework of the bilateral technical cooperation project "Supporting a Just Transition in Mexico", GIZ intends to award a contract for consulting services to foster a just transition in the Mexican industrial sector. The assignment will provide technical advisory services to support the design and implementation of socially just decarbonisation processes in key industrial sectors, with a particular focus on industrial parks and their interaction with the energy sector. The contract is tendered through an international competitive procedure in line with GIZ rules and applicable EU public procurement regulations. In close coordination with GIZ, the contractor will support Mexican partner institutions and other stakeholders in translating just transition principles into concrete action in emissions-intensive industries. This includes promoting industrial decarbonisation, enabling the deployment of clean energy and circular economy solutions, and integrating social and gender considerations in industrial transformation processes. The assignment contributes directly to the achievement of the project's outcome and to four key result areas: strengthening governance frameworks for a just transition; improving enabling conditions for green technologies in industry and energy; advancing "just transition finance"; and piloting social and gender justice strategies at subnational level. A first core area of work is the provision of on-demand technical advice and specialised analysis on just transition in the industrial sector, including industrial parks. The contractor will support partners in assessing and designing regulatory and policy approaches to improve the business environment for low-carbon investments, and identifying opportunities where industrial decarbonisation can be aligned with energy transition planning, industrial policy, circular economy models and the use of green materials. All support is expected to systematically address social and gender dimensions, in line with the project's just transition approach. A second core area involves in-depth analytical work on mitigation potential and decarbonisation pathways for selected industrial parks and industrial clusters. This may include the development of emissions baselines and marginal abatement cost curves, scenario modelling for different technology and investment options, and the analysis of

economic, social and environmental co-benefits under a just transition perspective. The contractor will work closely with GIZ and national partners to define the scope of these analyses and to translate findings into practical recommendations for policymakers, industrial park operators, companies and financial institutions. A third area of work is strategic communication and knowledge management. The contractor will support the development of narratives around just transition in the Mexican industrial sector and will produce communication and knowledge products such as policy briefs, reports, infographics, editorial and audiovisual materials. The services may also include conceptual and organisational support to events, dialogue formats and peer-learning activities, to disseminate lessons learned and good practices from pilot interventions in industrial parks and other industrial contexts. A fourth area focuses on capacity development. The contractor will design and implement training formats, workshops and other learning tools for key actors at national and subnational levels, including public institutions, industrial park operators, companies, financial institutions, academia and civil society. These activities aim to strengthen technical competencies and practical know-how on just transition, industrial decarbonisation, green and climate finance, circular economy and energy transition, with particular attention to the inclusion of women and groups in vulnerable situations. The contract is expected to run from February 2027 to August 2028. Primary target groups include key actors from the energy, industrial sectors and industrial park operators, as well as state-level economic and environmental authorities and relevant federal institutions. Secondary target groups comprise affected communities, labour representatives, civil society organisations and academic institutions. The assignment builds on and complements cooperation with national and international partners, including UNIDO, Mexican state-level associations such as AMSDE and ANAAE, and the Mexican Association of Private Industrial Parks (AMPIP). To deliver these services, the contractor is expected to provide a multidisciplinary expert team. This includes a team leader with strong experience in industrial decarbonisation and just transition, as well as experts in energy, industrial technologies and eco-industrial park developments, green and climate finance, social and gender impact analysis, strategic communication and capacity development. A pool of additional short-term specialists with national and international experience should be available to cover specific thematic and methodological needs. Bidders are expected to demonstrate substantial experience in climate change mitigation, industrial and energy transitions, and collaboration with public and private stakeholders, and previous work with international cooperation, preferably in Mexico or Latin America. The services will be delivered through a combination of on-demand support and the implementation of result-oriented activities and milestones agreed with GIZ. The assignment includes robust project and knowledge management, results-based monitoring and regular reporting, and must comply with GIZ requirements on data protection, information security, gender equality and environmental and climate safeguards.

Miljörådgivning

Optioner:

Beskrivning av alternativen: GIZ may optionally commission contract amendments and/or increases based on the criteria in the tender documents to the successful bidder of this tender. For details, please see the terms of reference.

5.1.2. Leveransplats

Postadress: Permanent establishment of the GIZ project "Supporting a Just Transition in Mexico"

Ort: 03100 Col. Insurgentes San Borja, CDMX

Postnummer: 00000

Land: Mexiko

5.1.3. Uppskattad löptid

Varaktighet: 19 Månader

5.1.4. Förlängning

Högst antal förlängningar: 2

Ytterligare information om förlängningar: GIZ may optionally commission contract amendments and/or increases based on the criteria in the tender documents to the successful bidder of this tender. For details, please see the terms of reference.

5.1.6. Allmänna upplysningar

Reserverad upphandling:

Deltagande är inte reserverat.

Namn på och yrkeskvalifikationer för den personal som ska utföra kontraktet måste anges:

Behöver inte anges

Upphandlingsprojekt som inte finansieras med EU-medel

Upphandlingen omfattas av Världshandelsorganisationens avtal om offentlig upphandling, GPA : ja

Upphandlingen är också lämplig för små och medelstora företag: ja

Kompletterande information: #Besonders auch geeignet für:other-sme#

5.1.7. Strategisk upphandling

Syftet med strategisk upphandling: Minskning av miljöpåverkan

Beskrivning: see above

Syftet med strategisk upphandling: Främjande av innovation

Beskrivning: see above

Syftet med strategisk upphandling: Främjande av social hållbarhet

Beskrivning: see above

Metod som ska minska miljöpåverkan: Omställning till en cirkulär ekonomi, Begränsning av klimatförändringar, Förebyggande och begränsning av miljöföroreningar

Socialt mål som främjas: Jämställdhet mellan kvinnor och män, Tillbörlig aktsamhet i fråga om mänskliga rättigheter i globala leveranskedjor, Rättvisa arbetsvillkor, Annat

Innovationsupphandling: De upphandlade byggentreprenaderna, varorna eller tjänsterna innebär processinnovation.

5.1.9. Urvalskriterier

Källor till urvalskriterier: Meddelande

Kriterium: Andra ekonomiska eller finansiella krav

Beskrivning av urvalskriterium: EN-A1: Principles for the execution of orders (Mit dem Teilnahmeantrag; Mittels Eigenerklärung): 1. Self-declaration: name of company and address, tax ID, registration and commercial register number or equivalent register in accordance with the legal provisions of the country of origin. 2. No grounds for exclusion pursuant to § 123, § 124 GWB, § 22 LkSG, EU-Russia sanctions 3. Declaration of bidding consortium and/or declaration of subcontractors (if applicable)

Kriterium: Andra ekonomiska eller finansiella krav

Beskrivning av urvalskriterium: EN-A2: Conditions for the reduction of candidates (Mit dem Teilnahmeantrag; Mittels Eigenerklärung): If we receive more than 4 requests to participate, we will make a selection based on the criteria laid out in the procurement documents and invite tenders only from the 4 candidates with the highest scores. We reserve the right to cancel the procurement procedure if we receive fewer than 2 requests to participate. B.III Weighted criteria: 1. Technical experience (90%) 1.1 Industrial decarbonisation, mitigation assessment and transition pathways - advisory services, technical studies and/or capacity development (35%) 1.2 (Eco-) Industrial Parks - advisory services and capacity development to design/plan or operate industrial areas (20%) 1.3 Industrial policy and governance - advisory services and capacity development for national and subnational authorities (20%) 1.4 Just transition approaches, including social and environmental safeguards, stakeholder participation, workforce transformation or equitable transition outcomes - advisory services, technical studies and/or capacity development (15%) 2. Regional Experience (0%) 3. Experience of development projects (at least 50% ODA-financed) (10%)

Kriterium: Referenser på angivna tjänster

Beskrivning av urvalskriterium: EN-B1: Technical and professional ability (Mit dem Teilnahmeantrag; Mittels Eigenerklärung): 1. The technical assessment is only based on reference projects with a minimum commission value of 500,000.00 EUR. 2. At least 5 reference projects in the technical field "Low-Carbon Industrial Transformation", of which at least 3 reference projects in the region of Latin America and the Caribbean and/or Southern America and/or Central America in the last 36 months (deadline: date of publication of invitation to tender).

Kriterium: Genomsnittlig årlig omsättning

Beskrivning av urvalskriterium: EN-C1: Economic and financial standing (Mit dem Teilnahmeantrag; Mittels Eigenerklärung): Average annual turnover for the last three financial years (last-but-four financial year can be included in case of tenders held within six months of end of last financial year), at least: 1,500,000.00 EUR.

Kriterium: Andra ekonomiska eller finansiella krav

Beskrivning av urvalskriterium: EN-C2: Economic and financial standing (Mit dem Teilnahmeantrag; Mittels Eigenerklärung): Average number of employees and managers for the past three calendar years, at least 15 persons.

Kriterium: Referenser på angivna tjänster

Beskrivning av urvalskriterium: Assessment of technical eligibility / weighted criteria for the selection of candidates - B.III Weighted criteria: 1. Technical experience (90%) 1.1 Industrial decarbonisation, mitigation assessment and transition pathways - advisory services, technical studies and/or capacity development (35%) 1.2 (Eco-) Industrial Parks - advisory services and capacity development to design/plan or operate industrial areas (20%) 1.3 Industrial policy and governance - advisory services and capacity development for national and subnational authorities (20%) 1.4 Just transition approaches, including social and environmental safeguards, stakeholder participation, workforce transformation or equitable transition outcomes - advisory services, technical studies and/or capacity development (15%) 2. Regional Experience (0%) 3. Experience of development projects (at least 50% ODA-financed) (10%)

Kriterierna kommer att användas för att välja anbudssökande som bjuds in att delta i det andra steget i förfarandet

Viktning (procentandel, exakt): 100,00

Information om det andra steget i ett förfarande med två steg:

Minsta antalet anbudssökande som inbjuds att delta i andra steget i förfarandet: 4

Högsta antalet anbudssökande som inbjuds att delta i andra steget i förfarandet: 4

Förfarandet kommer att äga rum i på varandra följande steg. I varje steg kan några deltagare komma att uteslutas

Köparen förbehåller sig rätten att tilldela kontraktet på grundval av de ursprungliga anbuden utan ytterligare förhandlingar

5.1.11. Upphandlingsdokument

Språk som upphandlingsdokumenten är officiellt tillgängliga på: engelska

Sista dag för att begära kompletterande information: 23/09/2026 23:59:59 (UTC+02:00)

5.1.12. Upphandlingsvillkor**Villkor för förfarandet:**

Beräknat datum för avsändning av inbjudan att lämna anbud: 22/10/2026

Villkor för inlämning:

Elektronisk inlämning: Krävs

Adress för inlämning: <https://ausschreibungen.giz.de/Satellite/notice/CXTRYY6DYYV9V1S3>

De språk som kan användas i anbuderna eller anbudsansökningarna: engelska

Elektronisk katalog: Ej tillåten

Alternativa anbud: Ej tillåten

Anbudsgivare får lämna in fler än ett anbud: Ej tillåten

Tidsfrist för mottagande av anbudsansökningar: 05/10/2026 12:00:00 (UTC+02:00)

Östeuropeisk tid / centraleuropeisk sommartid

Information som kan kompletteras efter det att inlämningsfristen har löpt ut:

Viss saknad information om leverantören kan kompletteras efter det att inlämningsfristen har löpt ut.

Kompletterande information: GIZ asks the applicant or bidder to submit, complete or correct documents, within the framework laid down by law.

Kontraktsvillkor:

Kontraktet måste genomföras inom ramen för program för skyddad anställning: Nej

Villkor som gäller genomförandet av kontraktet: The execution conditions result from the information given in the contract notice and the tender documents.

Elektronisk fakturering: Krävs

Elektronisk beställning kommer att användas: ja

Elektronisk betalning kommer att användas: ja

5.1.15. Metoder**Ramavtal:**

Upphandlingen avser inte ett ramavtal

Information om det dynamiska inköpssystemet:

Upphandlingen avser inte ett dynamiskt inköpssystem

5.1.16. Kompletterande information, medling och prövning

Prövningsorganisation: Vergabekammern des Bundes

Information om tidsfrist för prövning: According to Article 160, Section 3 of the German Act Against Restraint of Competition (GWB), application for review is not permissible insofar as 1. the applicant has identified the claimed infringement of the procurement rules before submitting the application for review and has not submitted a complaint to the contracting authority within a period of 10 calendar days; the expiry of the period pursuant to Article 134, Section 2 remains unaffected, 2. complaints of infringements of procurement rules that are evident in the tender notice are not submitted to the contracting authority at the latest by the expiry of the deadline for the application or by the deadline for the submission of bids, specified in the tender notice. 3. complaints of infringements of procurement rules that first become evident in the tender documents are not submitted to the contracting authority at the latest by the expiry of the deadline for application or by the deadline for the submission of bids, 4. more than 15 calendar days have expired since receipt of notification from the contracting authority that it is unwilling to redress the complaint. Sentence 1 does not apply in the case of an application to determine the invalidity of the contract in accordance with Article 135, Section 1 (2). Article 134, Section 1, Sentence 2 remains unaffected.
