Kriterium:

Typ: Pris

Beskrivning: Price

Kategori av tilldelningskriteriet vikt: Viktning (procentandel, exakt)

Sifferangivelse för tilldelningskriterium: 100

Kriterium:

Typ: Kvalitet

Beskrivning: In this procurement, the environment is not weighted as an award criteria by 30%. The contracting authority has chosen to have strict minimum requirements for the environment that, according to the contracting authority's assessment, will have a better environmental effect than setting up an environment as an award criteria, see the Procurement Act §5, letter b). In this competition, it is a requirement that the tenderer commits to only use vehicles that are either zero emission vehicles (100% battery electric or hydrogen) or biogas vehicles that as a minimum fulfil Euro class 6/VI in the execution of the contract (last transport stretch/cargo mile). In addition it is a requirement that the tenderer undertakes to comply with a number of environmental requirements, which are in the standard requirement specifications for Oslo municipality (SKOK). By setting such minimum requirements, it is ensured better climate and environmental effect than by setting up award criteria connected to the environment. This is because, even with a minimum of 30 percent weighting of the environment, the price risks being decisive in the competition, and that one thus ends up without the minimum requirements that are now set for the environment.
